10 WATTS ZENER DIODES

ZENER DIODES

Low-voltage, alloy-junction zener diodes in hermetically sealed package with cathode connected to case.

Polarity: Cathode-to-case
(reverse polarity units are available and designed by an "R" suffix.

MAXIMUM RATINGS:

Junction and Storage
Temperature: -65°C to + 175°C

DC Power Dissipation: 10 Watts
(Derate 83.3 mW/°C above 55°C)

The type numbers shown in the table have a standard tolerance on the nominal zener voltage of + 10%. A standard tolerance of +5% on individual units is also available and is indicated by suffixing "A" to the standard type number.

D04
