

3A, 4MHz HIGH EFFICIENCY SYNCHRONOUS BUCK CONVERTER

Description

The AP3409/A is a current mode, PWM synchronous buck DC/DC converter, capable of driving a 3A load with high efficiency, excellent line and load regulation. It operates in continuous PWM mode.

The AP3409/A integrates synchronous P-channel and N-channel power MOSFET switches with low on-resistance. It is ideal for portable applications powered from a single Li-ion battery. 100% duty cycle and low on-resistance P-channel internal power MOSFET can maximize the battery life.

The switching frequency of AP3409/A can be programmable from 300kHz to 4MHz, which allows small-sized components, such as capacitors and inductors. A standard series of inductors from several different manufacturers are available. This feature greatly simplifies the design of switch-mode power supplies.

The AP3409/A is available in U-DFN3030-10 package.

Features

- Input Voltage Range: 2.6V to 5.5V
- Adjustable Output from 0.8V to 5V
- 0.8V Reference Voltage with $\pm 2\%$ Precision
- Output Current: 3A
- High Efficiency up to 95%
- Low $R_{DS(on)}$ Internal Switches
- Programmable Frequency: 300kHz to 4MHz
- Current Mode Control
- Forced Continuous-mode Operation
- 100% Duty Cycle
- Built-in Soft-start
- Built-in Short Circuit Protection
- Built-in Thermal Shutdown Protection
- Built-in Current Limit Function
- PGOOD Output Voltage Monitoring (For AP3409A)
- U-DFN3030-10 package
- **Totally Lead-free & Fully RoHS Compliant (Note 1 & 2)**
- **Halogen and Antimony Free. "Green" Device (Note 3)**

Notes:

1. No purposely added lead. Fully EU Directive 2002/95/EC (RoHS) & 2011/65/EU (RoHS 2) compliant.
2. See http://www.diodes.com/quality/lead_free.html for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.
3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.

Pin Assignments

**U-DFN3030-10 (DN Package)
For AP3409**

**U-DFN3030-10 (DN Package)
For AP3409A**

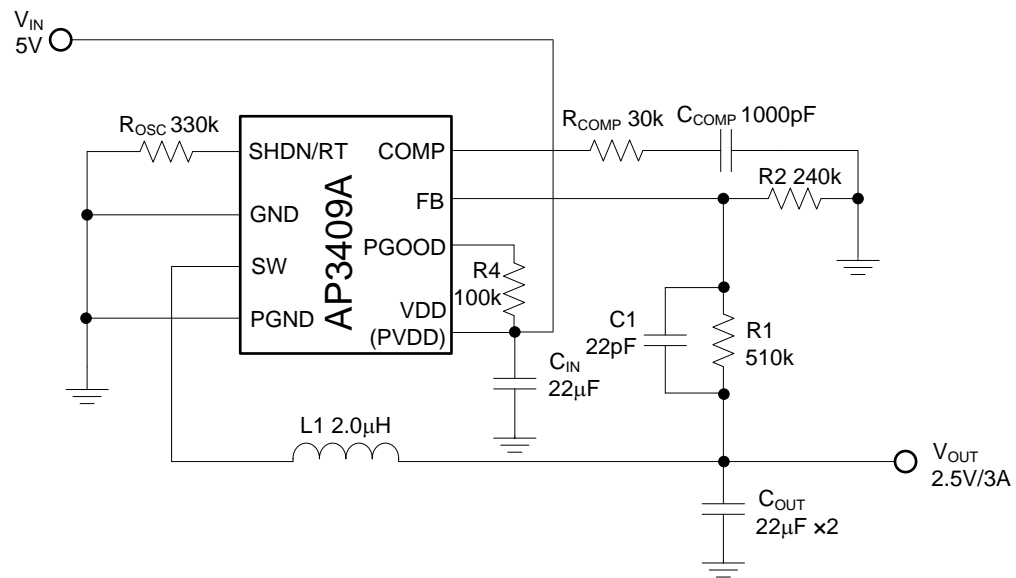

Applications

- Portable Media Player
- Digital Still and Video Cameras
- Notebook

Typical Applications Circuit (Note 4)

Typical Application of AP3409

Typical Application of AP3409A

Notes 4: $V_{OUT} = \frac{V_{FB} \times (R_1 + R_2)}{R_2}$

Pin Descriptions

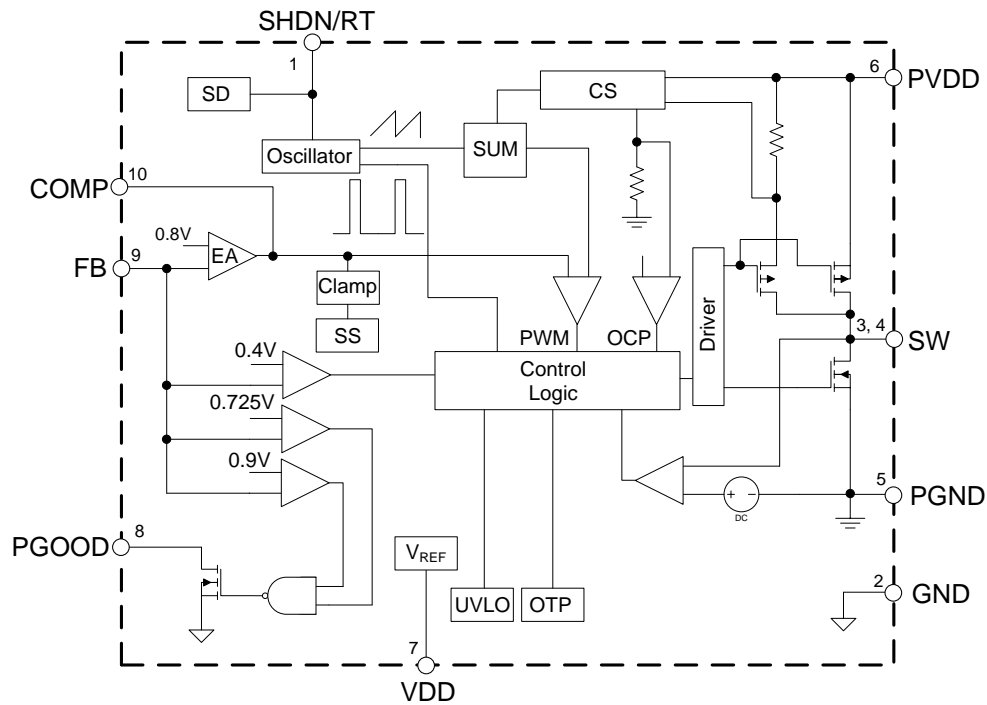

Pin Number		Pin Name	Function
AP3409	AP3409A		
1	1	SHDN/RT	Oscillator resistor input. Connect a resistor to GND from this pin to set the switching frequency. Forcing this pin to V_{DD} to shutdown the device
2	2	GND	Signal ground. All small-signal ground, such as the compensation components and exposed pad should be connected to this, which in turn connects to PGND at one point
3, 4	3, 4	SW	Internal power switch output. Connect this pin with one terminal of the inductor
5	5	PGND	Power ground. Connect this pin as close as possible to C_{IN} and C_{OUT}
6, 7	6	PVDD	Power Input Supply. Decouple this pin to PGND with a capacitor
8	7	VDD	Signal input supply. Decouple this pin to GND with a capacitor. Normally V_{DD} is equal to V_{PVDD}
–	8	PGOOD	Power good indicator. This pin is open-drain logic output that is pulled to ground when the output voltage is not within $\pm 12.5\%$ of regulation point
9	9	FB	Feedback voltage. This pin is the inverting input of internal error amplifier. It senses the converter output voltage through an external resistor divider. The internal reference voltage is 0.8V, which determines the output voltage through the resistor divider
10	10	COMP	Compensation input. This pin is the output of internal error amplifier. Connect external compensation elements to this pin to stabilize the control loop

Absolute Maximum Ratings (Note 5)

Symbol	Parameter	Rating	Unit
V_{DD}	VDD Pin Voltage	-0.3 to 6	V
V_{PVDD}	PVDD Pin Voltage	-0.3 to 6	V
V_{FB}	FB Pin Voltage	-0.3 to 6	V
V_{COMP}	COMP Pin Voltage	-0.3 to 6	V
V_{SW}	SW Pin Voltage	-0.3 to $V_{IN}+0.3$	V
V_{RT}	SHDN/RT Pin Voltage	-0.3 to 6	V
θ_{JA}	Thermal Resistance (Junction to Ambient)	110	°C/W
θ_{JC}	Thermal Resistance (Junction to Case)	3	°C/W
T_J	Operating Junction Temperature	+150	°C
T_{STG}	Storage Temperature	-65 to +150	°C
T_{LEAD}	Lead Temperature (Soldering, 10 sec)	+260	°C
—	ESD (Machine Model)	200	V
—	ESD (Human Body Model)	2000	V

Note 5: Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.

Recommended Operating Conditions

Symbol	Parameter	Min	Max	Unit
V_{IN}	Input Voltage	2.6	5.5	V
$I_{OUT (MAX)}$	Maximum Output Current	3	–	A
T_J	Operating Junction Temperature	-40	+125	°C

Electrical Characteristics ($V_{IN}=V_{DD}=V_{PVD}=3.3V$, $T_A=+25^{\circ}C$, unless otherwise specified.)

Symbol	Parameter	Conditions	Min	Typ	Max	Unit	
INPUT SECTION

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
