

BGA5L1BN6

18dB High Gain Low Noise Amplifier for LTE Lowband

Features

- Operating frequencies: 600 - 1000 MHz
- Insertion power gain: 18.5 dB
- Insertion Loss in bypass mode: 2.7 dB
- Low noise figure: 0.7 dB
- Low current consumption: 8.2 mA
- Multi-state control: Bypass- and high gain-Mode
- Ultra small TSNP-6-10 leadless package
- RF output internally matched to 50 Ohm
- Low external component count

Application

The LTE data rate can be significantly improved by using the Low Noise Amplifier. The integrated bypass function increases the overall system dynamic range and leads to more flexibility in the RF front-end.

In high gain mode the LNA offers best Noise Figure to ensure high data rates even on the LTE cell edge. Closer to the basestation the bypass mode can be activated reducing current consumption.

Product Validation

Qualified for industrial applications according to the relevant tests of JEDEC47/20/22

Features

Description

The BGA5L1BN6 is a front-end low noise amplifier for LTE which covers a wide frequency range from 600 MHz to 1000 MHz. The LNA provides 18.5 dB gain and 0.7 dB noise figure at a current consumption of 8.2 mA in the application configuration described in [Chapter 4](#). In bypass mode the LNA provides an insertion loss of 2.7 dB. The BGA5L1BN6 is based upon Infineon Technologies' B9HF Silicon Germanium technology. It operates from 1.5 V to 3.6 V supply voltage. The device features a single-line two-state control (Bypass- and High gain-Mode). OFF-state can be enabled by powering down VCC.

1) All voltages refer to GND-Node unless otherwise noted

2) T_S is measured on the ground lead at the soldering point

Attention: *Stresses above the max. values listed here may cause permanent damage to the device. Maximum ratings are absolute ratings; exceeding only one of these values may cause irreversible damage to the integrated circuit. Exposure to conditions at or below absolute maximum rating but above the specified maximum operation conditions may affect device reliability and life time. Functionality of the device might not be given under these conditions.*
