UHF power LDMOS transistor

Rev. 01 — 20 February 2006

Product data sheet

1. Product profile

1.1 General description

A 300 W LDMOS RF power transistor for broadcast transmitter applications and industrial applications. The transistor can deliver 250 W broadband over the full UHF band from 470 MHz to 860 MHz. The excellent ruggedness and broadband performance of this device makes it ideal for digital transmitter applications.

CAUTION

This device is sensitive to ElectroStatic Discharge (ESD). Therefore care should be taken during transport and handling.

1.2 Features

- Typical 2-tone performance at 860 MHz, a drain-source voltage V_{DS} of 32 V and a quiescent drain current $I_{DQ} = 2 \times 0.9$ A:
 - ◆ Peak envelope power load power $P_{L(PEP)} = 300$ W
 - ◆ Gain $G_p = 15$ dB
 - ◆ Drain efficiency $\eta_D = 43$ %
 - ◆ Third order intermodulation distortion $IMD3 = -28$ dBc
- Typical DVB performance at 858 MHz, a drain-source voltage V_{DS} of 32 V and a quiescent drain current $I_{DQ} = 2 \times 0.9$ A:
 - ◆ Average output power $P_{L(AV)} = 70$ W
 - ◆ Gain $G_p = 15$ dB
 - ◆ Drain efficiency $\eta_D = 30$ %
 - ◆ Third order intermodulation distortion $IMD3 = -28$ dBc (4.3 MHz from center frequency)
- Advanced flange material for optimum thermal behavior and reliability
- Excellent ruggedness
- High power gain
- Designed for broadband operation (UHF band)
- Excellent reliability
- Internal input and output matching for high gain and optimum broadband operation
- Source on underside eliminates DC isolators, reducing common-mode inductance
- Easy power control

PHILIPS

1.3 Applications

- Communication transmitter applications in the UHF band
- Industrial applications in the UHF band

7.2 Ruggedness in class-AB operation

The BLF872 is capable of withstanding a load mismatch corresponding to $VSWR = 10 : 1$ through all phases under the following conditions: $V_{DS} = 32 \text{ V}$; $f = 860 \text{ MHz}$ at rated power.

Measured in a common-source broadband (470 MHz to 860 MHz) test circuit.

Level	Data sheet status ^[1]	Product status ^{[2] [3]}	Definition
I	Objective data	Development	This data sheet contains data from the objective specification for product development. Philips Semiconductors reserves the right to change the specification in any manner without notice.
II	Preliminary data	Qualification	This data sheet contains data from the preliminary specification. Supplementary data will be published at a later date. Philips Semiconductors reserves the right to change the specification without notice, in order to improve the design and supply the best possible product.
III	Product data	Production	This data sheet contains data from the product specification. Philips Semiconductors reserves the right to make changes at any time in order to improve the design, manufacturing and supply. Relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN).

[1] Please consult the most recently issued data sheet before initiating or completing a design.

[2] The product status of the device(s) described in this data sheet may have changed since this data sheet was published. The latest information is available on the Internet at URL <http://www.semiconductors.philips.com>.

[3] For data sheets describing multiple type numbers, the highest-level product status determines the data sheet status.

13. Definitions

Short-form specification — The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.

Limiting values definition — Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 60134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

Application information — Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.

Right to make changes — Philips Semiconductors reserves the right to make changes in the products - including circuits, standard cells, and/or software - described or contained herein in order to improve design and/or performance. When the product is in full production (status 'Production'), relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no license or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.
