

CLED155

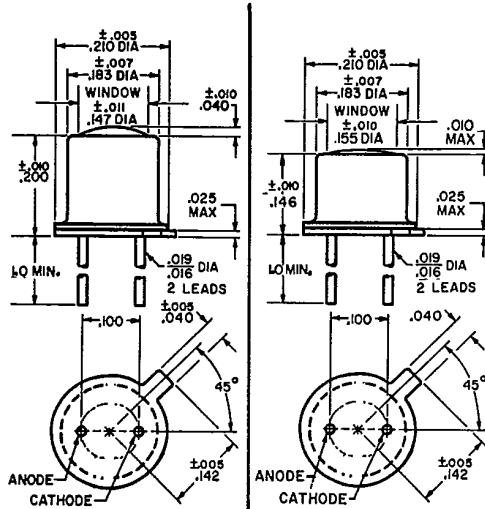

CLED155F

Gallium Aluminum Arsenide Infrared Emitting Diode

GENERAL DESCRIPTION — The Clairex CLED155 series Gallium Aluminum Arsenide diodes are in hermetically sealed TO46 packages. The lensed CLED155 emits a controlled pattern of infrared radiation whereas the flat window CLED155F radiates a wide angle pattern. The peak spectral point is 880nm, thereby greatly matching Clairex's silicon photosensors.

ABSOLUTE MAXIMUM RATINGS

Continuous Current: 100ma (with heat sink)
 Reverse Voltage: 3V
 Peak Pulsed Current (P.W. = 1 μ s, DF = .01): 3Amp
 Power Dissipation: 165mw
 Derate: 1.65mw/ $^{\circ}$ C
 Operating Junction Temp. 125 $^{\circ}$ C

7

ELECTRICAL CHARACTERISTICS (25 $^{\circ}$ C Free Air unless otherwise designated.)

Symbol	Characteristics	Test Conditions	Min.	Typ.	Max.	Unit
