## 1. APPLICATION

This Specification is applicable to 6.84cm (2.7 inch) Blanview TFT-LCD back-light monitor for non-military use.

- ◎ ORTUS TECHNOLOGY makes no warranty or assume no liability that use of this Product and/or any information including drawings in this Specification by Purchaser is not infringing any patent or other intellectual property rights owned by third parties, and ORTUS TECHNOLOGY shall not grant to Purchaser any right to use any patent or other intellectual property rights owned by third parties. Since this Specification contains ORTUS TECHNOLOGY's confidential information and copy right, Purchaser shall use them with high degree of care to prevent any unauthorized use, disclosure, duplication, publication or dissemination of ORTUS TECHNOLOGY'S confidential information and copy right.
- ◎ If Purchaser intends to use this Products for an application which requires higher level of reliability and/or safety in functionality and/or accuracy such as transport equipment (aircraft, train, automobile, etc.), disaster-prevention/security equipment or various safety equipment, Purchaser shall consult ORTUS TECHNOLOGY on such use in advance.
- ◎ This Product shall not be used for application which requires extremely higher level of reliability and/or safety such as aerospace equipment, telecommunication equipment for trunk lines, control equipment for nuclear facilities or life-support medical equipment.
- ◎ It must be noted as an mechanical design manner, especial attention in housing design to prevent arcuation/flexureor caused by stress to the LCD module shall be considered.
- ◎ ORTUS TECHNOLOGY assumes no liability for any damage resulting from misuse, abuse, and/or miss-operation of the Product deviating from the operating conditions and precautions described in the Specification.
- ◎ ORTUS TECHNOLOGY is not responsible for any nonconformities and defects that are not specified in this specifications.
- ◎ If any issue arises as to information provided in this Specification or any other information, ORTUS TECHNOLOGY and Purchaser shall discuss them in good faith and seek solution.
- ◎ ORTUS TECHNOLOGY assumes no liability for defects such as electrostatic discharge failure occurred during peeling off the protective film or Purchaser's assembly process.
- ◎ This Product is compatible for RoHS directive.

## 2. OUTLINE SPECIFICATIONS

### 2.1 Features of the Product

- 2.7" diagonal with resolution of 720[H]x320[V] dots.
- 6-bit 262,144 color display capability.
- Single power supply operation of 3V.
- Built in Timing generator (TG)
- Long life & High bright white LED back-light.
- Blanview TFT-LCD, improved outdoor readability.

### 2.2 Display Method

Items	Specifications	Remarks
Display type	TN type 262,144 Colors. Blanview, Normally white.	
Driving method	a-Si TFT Active matrix Line-scanning, Non-interlace	
Dot arrangement	RGB stripe arrangement	Refer to Fig. 1
Input signal type	6-bit RGB, parallel input.	
Backlight	Long life & High bright white LED.	

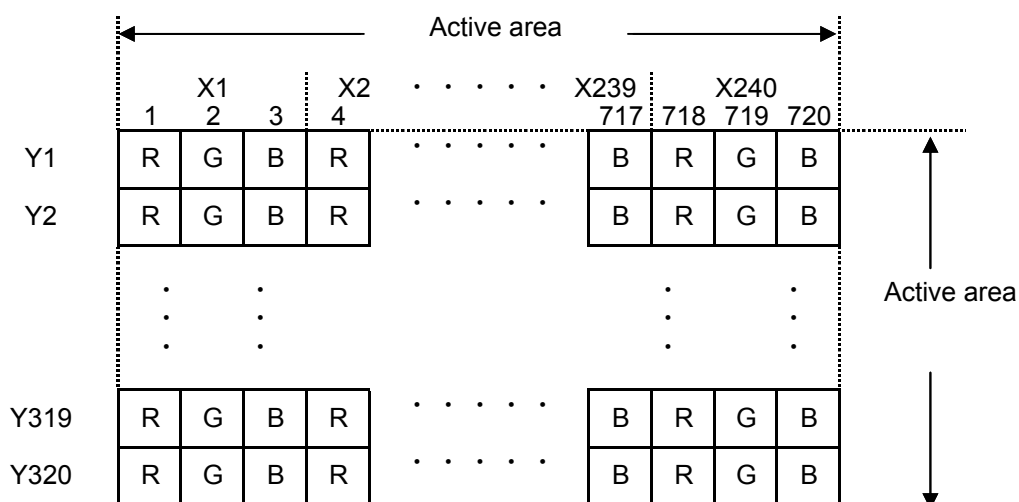

Fig. 1: Dot arrangement  
(FPC cable placed left)

## Features of Blanview

Backlight power consumption required to assure visibility (equivalent to 3.5"QVGA)

Contrast characteristics under 100,000lx (same condition as direct sunlight.)

With better contrast (higher contrast ratio), Blanview TFT-LCD has the best outdoor readability in three different types of TFT-LCD.

Below chart shows contrast value against panel surface brightness. (Horizontal: Panel surface brightness/ Vertical: Contrast value) LCD panel has enough outdoor readability above our Standard line. (ORTUS TECHNOLOGY criteria)

## 3. DIMENSIONS AND SHAPE

## 3.3 Serial Label (S-Label)

## 1) Display Items

S-label indicates the least significant digit of manufacture year (1 digit), manufacture month with below alphabet (1 letter), model code (5 characters), serial number (6 digits).

## \* Contents of Display

*	*	*****	*****
a	b	c	d

	Contents of display			
a	The least significant digit of manufacture year			
b	Manufacture month	Jan-A Feb-B Mar-C Apr-D	May-E Jun-F Jul-G Aug-H	Sep-I Oct-J Nov-K Dec-L
c	Model code	27FRC (Made in Japan) 27FSC (Made in Malaysia)		
d	Serial number			

## \* Example of indication of Serial label (S-label)

•Made in Japan

5J27FRC000125

means "manufactured in October 2015, 2.7" FR type, C specifications, serial number 000125"

•Made in Malaysia

5J27FSC000125

means "manufactured in October 2015, 2.7" FS type, C specifications, serial number 000125"

## 2) Location of Serial Label (S-label)

Refer to "3.2 Outward Form".

36	NC	Open
37	TEST2	Connect to Ground.
38	BLH	LED drive power source (Anode side)
39	BLL	LED drive power source (Cathode side)

- Recommended connector: HIROSE ELECTRIC FH23 series [FH23-39S-0.3SHW(05)]
- Please refer to the section "3.2 Outward Form" for pin assignment.
- Since FPC cable has gold plated terminals, gilt finish contact shoe connector is recommended.

Estimated Life of LED	LL	Ta=25°C, IL=7.0mA Note1	—	(50,000)	—	hr	

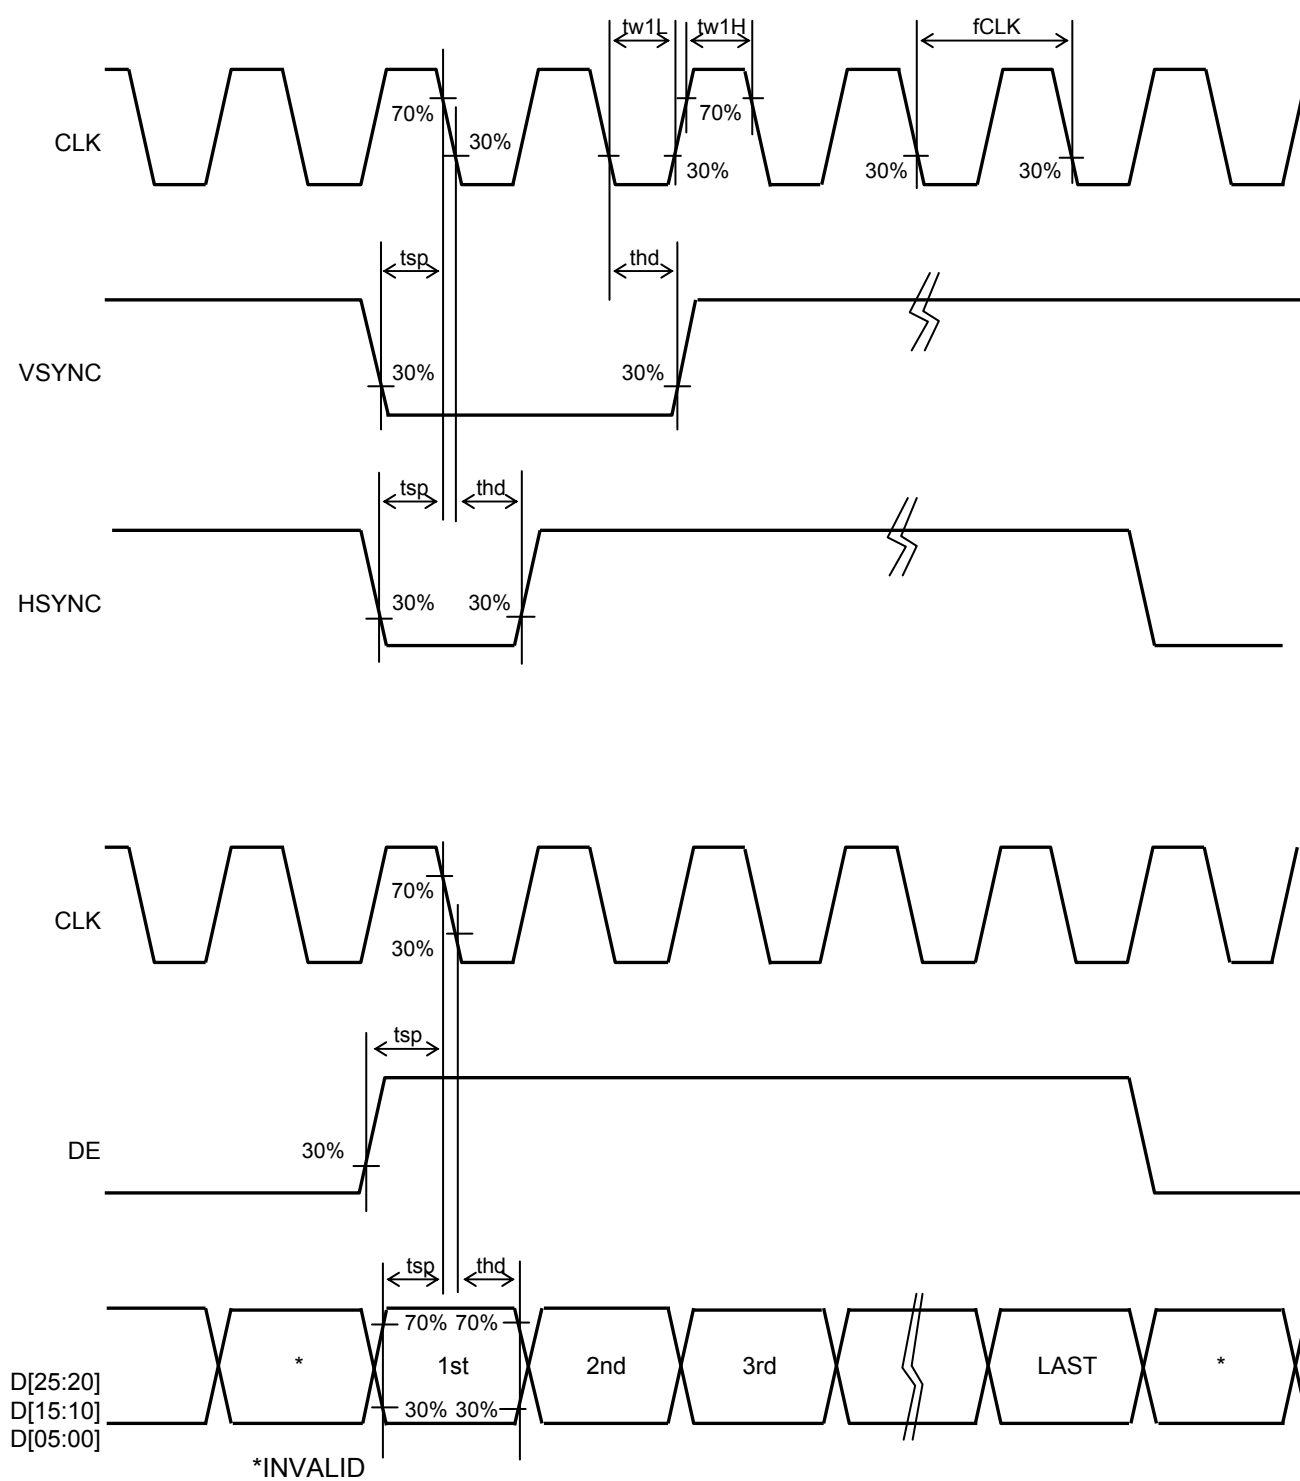

- Note1: - The lifetime of the LED is defined as a period till the brightness of the LED decreases to the half of its initial value.
- This figure is given as a reference purpose only, and not as a guarantee.
  - This figure is estimated for an LED operating alone.
- As the performance of an LED may differ when assembled as a monitor together with a TFT panel due to different environmental temperature.
- Estimated lifetime could vary on a different temperature and usually higher temperature could reduce the life significantly.

## 7.2 AC Characteristics

(Unless otherwise noted, Ta=25°C, VDD=3.0V, VSS=0V)

## 8. DESCRIPTION OF OPERATION

## 8.1 Power ON/OFF sequence

\*1 DOTCLK is used for Gate array CLK on FPC.  
VSYNC is used for Gate array's inside counter.  
It becomes the operation after CLK(DOTCLK),VSYNC input.

\*2 After the power supply, Please execute RESETB. (8.3 Reset sequence Reference)

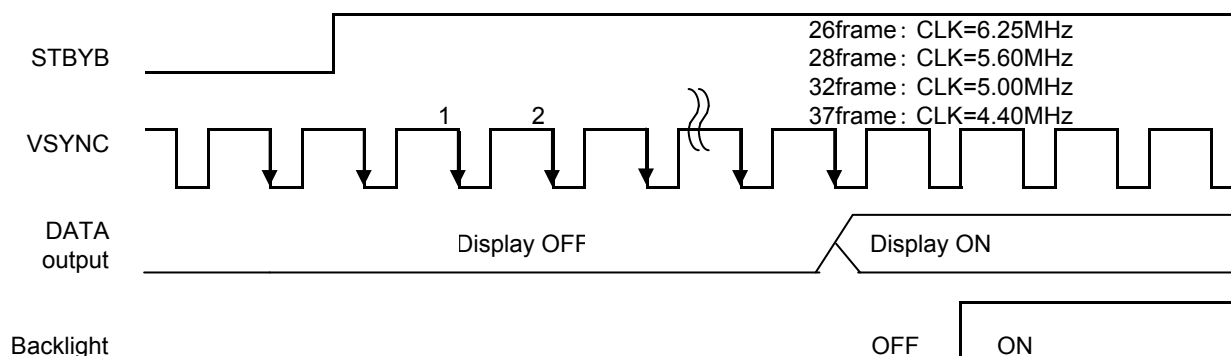

\*3 There is no regulations at time until each signal is supplied from RESETB "H"  
But meanwhile, It is necessary to fix each signal to "H" or "L".

\*4 It is necessary to supply VSYNC and CLK(DOTCLK) for 20 frames or less from STBYB "L" to  
turning off the power supply without leaving the afterimage.

## 8.2 Display ON/OFF sequence

It explains the display sequence when display ON/OFF by the STBYB signal.

The following time will be needed according to the CLK cycle by the time the display is begun from the standby release.

The following time will be needed according to the CLK cycle

by the time the standby sequence is ended from the standby setting.

Meanwhile, DOTCLK and the VSYNC signal should keep being supplied.

When DOTCLK and the VSYNC signal are stopped or the power supply is turned off to a regulated frame or less, the afterimage might remain.

## 8.3 Reset sequence

There is a limitation between the power supply turning on and the RESETB input.

Please defend the following conditions.

## 11. CRITERIA OF JUDGMENT

## 11.1 Defective Display and Screen Quality

Test Condition: Observed TFT-LCD monitor from front during operation with the following conditions

Driving Signal Raster Patter (RGB, white, black)  
 Signal condition [Data] : 3Fh, 2Ah, 00h (3 steps)  
 Observation distance 30 cm  
 Illuminance 200 to 350 lx  
 Backlight IL=7.0mA

Defect item	Defect content	Criteria
Display Quality	Line defect	Black, white or color line, 3 or more neighboring defective dots
		Not exists
	Dot defect	Uneven brightness on dot-by-dot base due to defective TFT or CF, or dust is counted as dot defect (brighter dot, darker dot) High bright dot: Visible through 2% ND filter at [Data]=00h Low bright dot: Visible through 5% ND filter at [Data]=00h Dark dot: Appear dark through white display at [Data]=2Ah Invisible through 5% ND filter at [Data]=00h)
		Refer to table 1

## 13. PACKING SPECIFICATIONS

- Step 1. Each product is to be placed in one of the cut-outs of the tray with the display surface facing upward.  
(15products per tray)
- Step 2. Each tray is to be piled up in same orientation and the trays be in a stack of 10.  
One empty tray is to be put on the top of stack of 10 trays.
- Step 3. 2 packs of moisture absorbers are to be placed on the top tray as shown in the drawing.  
Put piled trays into a sealing bag.  
Vacuum and seal the sealing bag with the vacuum sealing machine.
- Step 4. The stack of trays in the plastic back is to be inserted into a inner carton.
- Step 5. A corrugated board is to be placed on the top and on the bottom of the inner carton.  
The two corrugated boards and the inner carton is to be inserted into an outer carton.
- Step 6. The outer carton needs to sealed with packing tape as shown in the drawing.  
The model number, quantity of products, and shipping date are to be printed on the outer carton.  
If necessary, shipping labels or impression markings are to be put on the outer carton.
- Step 7. The outer carton is to be inserted into a extra outer carton with same direction.  
The extra outer carton needs to sealed with packing tape as shown in the drawing.
- Step 8. The model number, quantity of products, and shipping date are to be printed on the extra outer carton.  
If necessary, shipping labels or impression markings are to be put on the extra outer carton.

Remark: The return of packing materials is not required.

## 14. HANDLING INSTRUCTION

## 14.1 Cautions for Handling LCD panels

**Caution**

- (1) Do not make an impact on the LCD panel glass because it may break and you may get injured from it.
- (2) If the glass breaks, do not touch it with bare hands.  
(Fragment of broken glass may stick you or you cut yourself on it.)
- (3) If you get injured, receive adequate first aid and consult a medial doctor.
- (4) Do not let liquid crystal get into your mouth.  
(If the LCD panel glass breaks, try not let liquid crystal get into your mouth even toxic property of liquid crystal has not been confirmed.)
- (5) If liquid crystal adheres, rinse it out thoroughly.  
(If liquid crystal adheres to your cloth or skin, wipe it off with rubbing alcohol or wash it thoroughly with soap. If liquid crystal gets into eyes, rinse it with clean water for at least 15 minutes and consult an eye doctor.)
- (6) If you scrap this products, follow a disposal standard of industrial waste that is legally valid in the community, country or territory where you reside.
- (7) Do not connect or disconnect this product while its application products is powered on.
- (8) Do not attempt to disassemble or modify this product as it is precision component.
- (9) A part of soldering part has been exposed, and avoid contact (short-circuit) with a metallic part of the case etc. about FPC of this model, please.  
Please insulate it with the insulating tape etc. if necessary.  
The defective operation is caused, and there is a possibility to generation of heat and the ignition.
- (10) Since excess current protection circuit is not built in this TFT module, there is the possibility that LCD module or peripheral circuit become feverish and burned in case abnormamal operation is generated.  
We recommend you to add excess current protection circuit to power supply.

**Caution**

**This mark is used to indicate a precaution or an instruction which, if not correctly observed, may result in bodily injury, or material damages alone.**

#### 14.2 Precautions for Handling

- 1) Wear finger tips at incoming inspection and for handling the TFT monitors to keep display quality and keep the working area clean.  
Do not touch the surface of the polarizer as it is easily scratched.
- 2) Wear grounded wrist-straps and use electrostatic neutralization blowers to prevent static charge and discharge when handling the TFT monitors as the LED in this TFT monitors is damageable to electrostatic discharge,  
Properly set up equipment, jigs and machines, and keep working area clean and tidy for handling the TFT monitors.
- 3) Avoid strong mechanical shock including knocking, hitting or dropping to the TFT monitors for protecting their glass parts. Do not use the TFT monitors that have been experienced dropping or strong mechanical shock.
- 4) Do not use or storage the TFT monitors at high temperature and high humidity environment. Particularly, never use or storage the TFT monitors at a location where condensation builds up.
- 5) Avoid using and storing TFT monitors at a location where they are exposed to direct sunlight or ultraviolet rays to prevent the LCD panels from deterioration by ultraviolet rays.
- 6) Do not stain or damage the contacts of the FPC cable .  
Otherwise, it may cause poor contact or deteriorate reliability of the FPC cable.
- 7) The FPC cable is a design very weak to the bend and the pull as it is fixed with the tape.  
Do not bend or pull the FPC cable or carry the TFT monitor by holding the FPC cable.
- 8) Peel off the protective film on the TFT monitors during mounting process.  
Refer to the section 14.5 on how to peel off the protective film.  
We are not responsible for electrostatic discharge failures or other defects occur when peeling off the protective film.

#### 14.3 Precautions for Operation

- 1) Since this TFT monitors are not equipped with light shielding for the driver IC, do not expose the driver IC to strong lights during operation as it may cause functional failures.
- 2) In case of powering up or powering off this LCD module,  
be sure to comply the sequence as instructed in this specification.
- 3) Do not plug in or out the FPC cable while power supply is switch on.  
Plug the FPC cable in and out while power supply is switched off.
- 4) Do not operate the TFT monitors in the strong magnetic field. It may break the TFT monitors.
- 5) Do not display a fixed image on the screen for a long time.  
Use a screen-saver or other measures to avoid a fixed image displayed on the screen for a long time. Otherwise, it may cause burn-in image on the screen due the characteristics of liquid crystal.

#### 14.4 Storage Condition for Shipping Cartons

##### Storage environment

- Temperature 0 to 40° C
- Humidity 60%RH or less  
No-condensing occurs under low temperature with high humidity condition.
- Atmosphere No poisonous gas that can erode electronic components and/or wiring materials should be detected.
- Time period 1 year
- Unpacking To protect the TFT monitors from static damage during unpacking, keep room humidity more than 50%RH and implement effective countermeasures against static electricity such as establishing a ground (an earth) before unpacking.
- Maximum piling up 7 cartons

#### 14.5 Precautions for Peeling off the Protective film

The followings work environment and work method are recommended to prevent the TFT monitors from static damage or adhesion of dust when peeling off the protective films.

##### A) Work Environment

- a) Humidity: 50 to 70 %RH, Temperature 15° C to 27° C
- b) Operators should wear conductive shoes, conductive clothes, conductive finger tips and grounded wrist-straps. Anti-static treatment should be implemented to work area's floor.
- c) Use a room shielded against outside dust with sticky floor mat laid at the entrance to eliminate dirt.

##### B) Work Method

The following procedures should taken to prevent the driver ICs from charging and discharging.

- a) Use an electrostatic neutralization blower to blow air on the TFT monitors to its lower left when the LCD-FPC cable is facing to the leftside.  
Optimize direction of the blowing air and the distance between the TFT monitors and the electrostatic neutralization blower.
- b) Put an adhesive tape (Scotch tape, etc) at the lower left corner area of the protective film to prevent scratch on surface of TFT monitors.
- c) Peel off the adhesive tape slowly (spending more than 2 secs to complete) by pulling it to opposite direction.

Direction of blowing air  
(Optimize air direction and the distance)

## Reference Method for Measuring Optical Characteristics and Performance

## 1. Measurement Condition (Backlight ON)

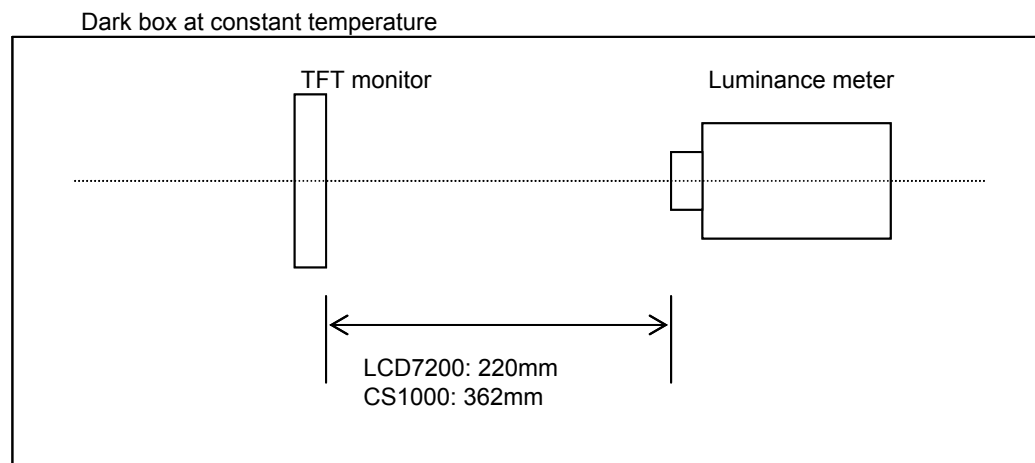

Measuring instruments: CS1000(KONICA MINOLTA), LCD7200(OTSUKA ELECTRONICS), EZcontrast160D(ELDIM)

Driving condition: Refer to the section "Optical Characteristics"

Measured temperature: 25° C unless specified

Measurement system: See the chart below. The luminance meter is placed on the normal line of measurement system.

Measurement point: At the center of the screen unless otherwise specified

Measurement is made after 30 minutes of lighting of the backlight.

Measurement point: At the center point of the screen  
 Brightness distribution: 9 points shown in the following drawing.

Backlight IL = 7.0mA

Dimensional ratio of active area

Measurement Condition (Contrast ratio Backlight OFF only)

Measuring instruments: LCD7200(OTSUKA ELECTRONICS), Ring Light(40,000 lx,  $\phi 58$ )

Driving condition: Refer to the section "Optical Characteristics"

Measured temperature: 25°C unless specified

Measurement system: See the chart below.

Measurement point: At the center of the screen.

## 2. Test Method

Notice	Item	Test method	Measuring instrument	Remark
1	Response time	<p>Measure output signal waveform by the luminance meter when raster of window pattern is changed from white to black and from black to white.</p> <p>White      Black      White</p> <p>White</p> <p>100%</p> <p>90%</p> <p>10%</p> <p>0% Black</p> <p>TON      TOFF</p>	LCD7200	Black display [Data]=00h White display [Data]=3Fh TON Rise time TOFF Fall time
2	Contrast ratio	<p>Measure maximum luminance Y1([Data]=3Fh) and minimum luminance Y2([Data]=00h) at the center of the screen by displaying raster or window pattern. Then calculate the ratio between these two values.</p> <p>Contrast ratio = Y1/Y2</p> <p>Diameter of measuring point: 8mmφ(CS1000)</p> <p>Diameter of measuring point: 3mmφ(LCD7200)</p>	CS1000 LCD7200	
3	Viewing angle Horizontal $\theta$ Vertical $\phi$	Move the luminance meter from right to left and up and down and determine the angles where contrast ratio is 10.	EZcontrast160D
