

CT83x Series

Omnipolar Digital TMR Latch/Sensor for Consumer & Industrial Applications

Product Description

The CT83x Series of integrated omnipolar magnetic latches and analog sensor are designed for consumer and industrial switching applications. It is based on Crocus Technology's patented Magnetic Logic Unit™ (MLU™) technology with integrated CMOS process to provide a monolithic solution for superior sensing performance.

This series of magnetic latches feature an industry leading low power consumption as low as 200 nA. They are capable of handling large air gap applications with low magnetic fields down to 0.9 mT with best in class high frequency performance. The CT83x is offered in active-low push-pull CMOS and open drain configuration for design flexibility. The latches are available in a low profile and small form factor 4-lead LGA and 3-lead SOT-23 packages, providing cost effective and space-saving solutions for high volume manufacturing. Please contact factory for custom solutions.

(1) RoHS is defined as semiconductor products that are compliant to the current EU RoHS requirements. It also will meet the requirement that RoHS substances do not exceed 0.1% by weight in homogeneous materials. Green is defined as the content of Chlorine (Cl), Bromine (Br) and Antimony Trioxide based flame retardants satisfy JS709B low halogen requirements of ≤ 1,000 ppm.

(2) MSL Rating = Moisture Sensitivity Level Rating as defined by JEDEC industry standard classifications.

(3) Device Marking for SOT23 is defined as XZ YWWS where XZ = part number, Y = year, WW = work week and S = sequential number. LGA is defined as X where X = part number and YZ = date code information.
