-200mA / -30V Low Vce (sat) Digital transistors (with built-in resistors)

DTB743XE / DTB743XM

Applications

Inverter, Interface, Driver

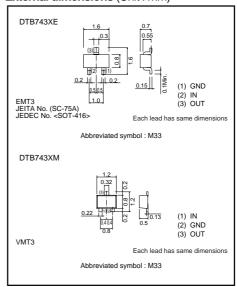

● Feature

- 1) VCE(sat) is lower than the conventional products.
- 2) Built-in bias resistors enable the configuration of an inverter circuit without connecting external input resistors (see equivalent circuit).
- 3) The bias resistors consist of thin-film resistors with complete isolation to allow positive biasing of the input. They also have the advantage of almost completely eliminating parasitic effects.
- 4) Only the on / off conditions need to be set for operation, making the device design easy.
