Specifications and Applications Information

1/24/00

Preliminary

The E2322 (E200II Series) dc to ac inverter is specifically designed to power the Sharp LQ057Q3DC02 LCD display to a moderate brightness level from a +5 volt dc source.

The E2322's small size, encapsulated package makes it the ideal power source for applications where small size, high efficiency and reliability are critical.

This inverter is designed to satisfy the most common cold-cathode lighting requirements for the Sharp LQ057Q3DC02 display. Custom units, providing different inputs, outputs or package refinements are available.
