

715-2164. Cylinder  
715-2383 transporter.

## Product Specification Sheet

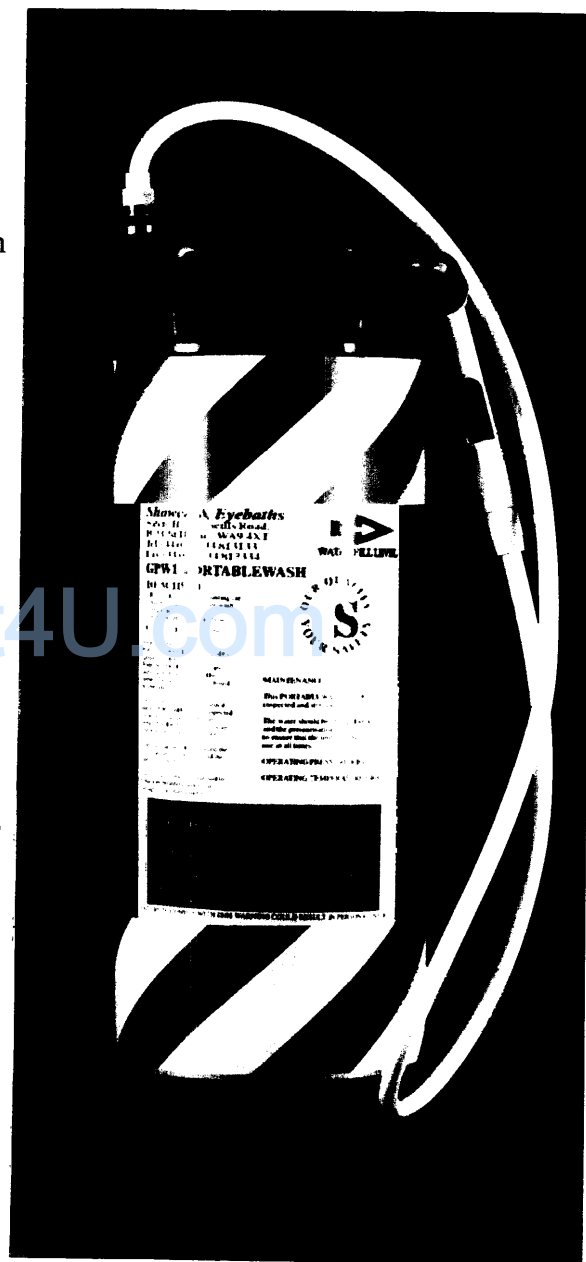

S & E Code: GPW1

Farnell order code: 715-2164

Description: Portable Eyewash

### Features & Benefits:-

- The cylinder is of robust Stainless Steel construction for long life.
- Can be transported to an operative or area where a mains fed unit is not available.
- Fitted with tank pressure gauge for easy indication that the unit is charged and ready for use.
- Ease of cleaning and filling is facilitated by large easily removable cap.
- Delivers 15 litres of clean cold water in 3 minutes + or - 10%.
- Fitted with flow control device ensuring that water is delivered at a steady rate.
- Fitted with safety valve which operates at 9 bar which is above the recommended charging level of 6 bar.
- Easily pressurised on most sites given that breathing quality air is available from the line.
- Cylinder clearly labelled with all relevant safety, usage and maintenance instructions.
- Sterilisation tablets are recommended to be used on a 6 monthly basis.
