1. When ordering, please specify a **packaging** code:

HA4000-ALD

Packaging: D = 13" machine ready reel. EIA-481 embossed plastic tape (200 parts per full reel).

B = Less than full reel. In tape, but not machine ready. To have a leader and trailer added (\$25 charge), use code letter D instead.

2. Inductance is for the primary, measured across pins 2 and 4 at 200 kHz, 0.1 Vrms, 0 Adc.

3. DCR for the primary is measured from pin 2 to pin 4. DCR for the secondary is for each winding.

4. Leakage inductance is for the full primary and is measured with the secondary shorted.

5. Output is with the secondary windings connected in series. Bias winding output is 10 V, 65 mA.

6. Electrical specifications at 25°C.

Refer to Doc 362 "Soldering Surface Mount Components" before soldering.

Recommended Land Pattern

Pins 7 and 9 to be connected on the PC board. Pin 3 is internally connected only and does not touch the PC board.

Dimensions are in $\frac{\text{inches}}{\text{mm}}$
