

### HCPL-2730/0730/2731/0731

## **Dual-Channel Low Input Current, High-Gain Optocouplers**

### Overview

These dual-channel optocouplers contain a separated pair of GaAsP light-emitting diodes optically coupled to a pair of integrated high-gain photodetectors. They provide extremely high current transfer ratio and excellent input-output common mode transient immunity. A separate pin for the photodiodes and first gain stages (V<sub>CC</sub>) permits lower output saturation voltage and higher speed operation than possible with conventional photo-darlington type optocouplers. In addition, V<sub>CC</sub> may be as low as 1.6V without adversely affecting the parametric performance.

These dual-channel optocouplers are available in an 8-pin DIP and in an industry standard SO-8 package. The following is a cross reference table listing the 8-pin DIP part number and the electrically equivalent SOIC-8 part number.

| 8-Pin DIP | SO-8      |
|-----------|-----------|
| HCPL-2730 | HCPL-0730 |
| HCPL-2731 | HCPL-0731 |

The SO-8 does not require "through holes" in a PCB. This package occupies approxmately one-third the footprint area of the standard dual-inline package. The lead profile is designed to be compatible with standard surface mount processes.

**CAUTION!** Take normal static precautions in handling and assembly of this component to prevent damage, degradation, or both that may be induced by ESD. The components featured in this data sheet are not to be used in military or aerospace applications or environments.

### **Features**

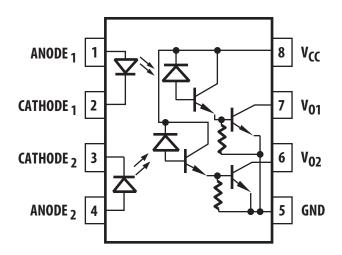

- High current transfer ratio 1800% typical
- Low input current requirements 0.5 mA
- Low output saturation voltage 0.1V
- High density packaging
- Performance guaranteed over temperature 0°C to 70°C
- LSTTL compatible
- High output current 60 mA
- Safety approval:
  - UL recognized 3750 V rms for 1 minute and 5000 Vrms (see Note) for 1 minute
  - CSA approved
- Available in 8-pin DIP and SO-8 footprint
- MIL-PRF-38534 hermetic version available (HCPL-5730/5731)
- Surface mount gull wing option available for 8-pin DIP (Option 300)

5000 V rms/1 minute withstand voltage rating is for Option 020 (HCPL-2730, HCPL-2731) products only.

### **Applications**

- Digital logic ground isolation
- Telephone ring detector
- Level shifting
- EIA RS-232C line receiver
- Polarity sensing
- Low input current line receiver long line or party line
- Microprocessor bus isolation
- Current loop receiver
- Line voltage status indicator low input power dissipation

### **Functional Diagram**

| TRUT | TRUTH TABLE    |  |  |  |  |  |  |
|------|----------------|--|--|--|--|--|--|
| LED  | V <sub>0</sub> |  |  |  |  |  |  |
| ON   | LOW            |  |  |  |  |  |  |
| OFF  | HIGH           |  |  |  |  |  |  |
|      |                |  |  |  |  |  |  |

NOTE: A 0.1-µF bypass capacitor connected between pins 5 and 8 is recommended.

Guaranteed operation at low input currents and the high current transfer ratio (CTR) reduce the magnitude and effects of CTR degradation.

The outstanding high temperature performance of this split Darlington-type output amplifier results from the inclusion of an integrated emitter-base bypass resistor that shunts photodiode and first stage leakage currents to ground.

The HCPL-2731/0731 have a 400% minimum CTR at an input current of only 0.5 mA making it ideal for use in low input current application, such as MOS, CMOS, and low-power logic interfacing or RS232C data transmission systems. In addition, the high CTR and high output current capability make this device extremely useful in applications where a high fanout is required. Compatibility with high-voltage CMOS logic systems is guaranteed by the 18V  $V_{CC}$  and  $V_{O}$  specifications and by testing output high leakage ( $I_{OH}$ ) at 18V.

The HCPL-2730/0730 are specified at an input current of 1.6 mA and have a 7V  $V_{CC}$  and  $V_{O}$  rating. The 300% minimum CTR allows TTL to TTL interfacing at this input current.

Important specifications, such as CTR, leakage current, and output saturation voltage, are guaranteed over the  $0^{\circ}$ C to  $70^{\circ}$ C temperature range to allow trouble-free system operation. Selection for lower input currents down to 250  $\mu$ A is available upon request.

### **Ordering Information**

HCPL-2730, HCPL-2731, HCPL-0730 and HCPL-0731 are UL Recognized with 3750 Vrms for 1 minute per UL1577 and are approved under CSA Component Acceptance Notice #5, File CA 88324.

To order, choose a part number from the part number column and combine with the desired option from the option column to form an order entry.

### Example 1:

HCPL-2730-520E to order product of 300-mil DIP Gull Wing Surface Mount package in Tape and Reel packaging with UL 5kVrms 1-minute rating in RoHS compliant.

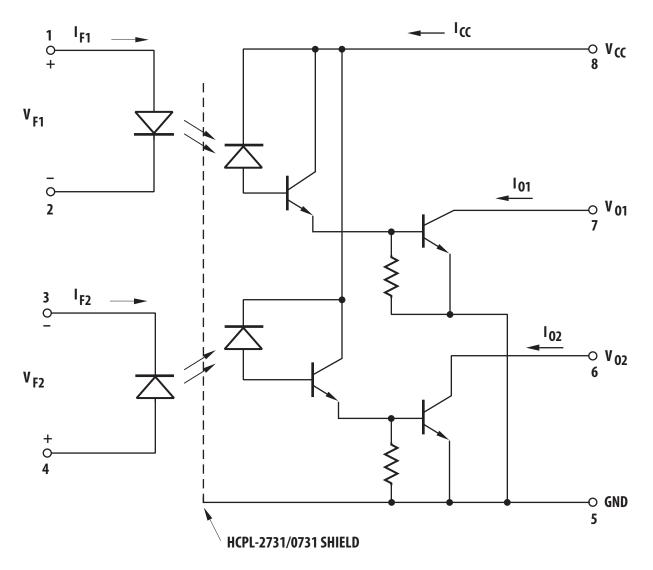

### Example 2:

HCPL-2730 to order product of 300-mil DIP package in tube packaging and non-RoHS compliant.

Option data sheets are available. Contact your Broadcom sales representative or authorized distributor for information.

**NOTE:** The notation "#XXX" is used for existing products, while (new) products launched since July 15, 2001 and RoHS compliant option use "-XXXE".

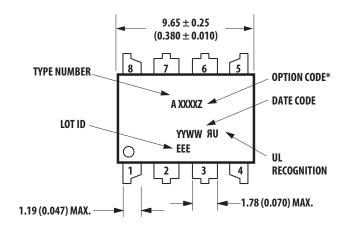

## **Schematic**

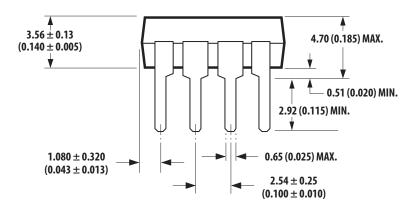

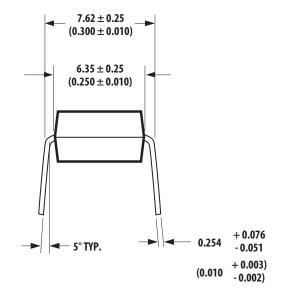

USE OF A 0.1  $\mu$ F BYPASS CAPACITOR CONNECTED BETWEEN PINS 5 AND 8 IS RECOMMENDED (SEE NOTE 8)

## **Package Outline Drawings**

### 8-Pin DIP Package (HCPL-2731/HCPL-2730)

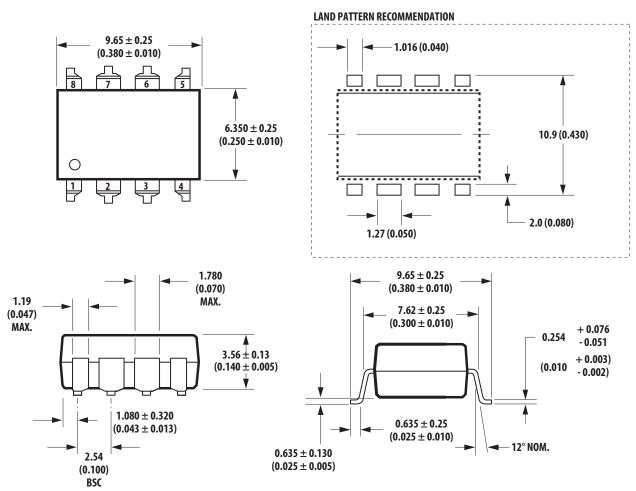

DIMENSIONS IN MILLIMETERS AND (INCHES).
\*MARKING CODE LETTER FOR OPTION NUMBERS
"L" = OPTION 020
OPTION NUMBERS 300 AND 500 NOT MARKED.

NOTE: FLOATING LEAD PROTRUSION IS 0.25 mm (10 mils) MAX.

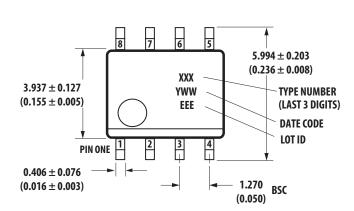

# 8-Pin DIP Package with Gull Wing Surface Mount Option 300 (HCPL-2731/HCPL-2730)

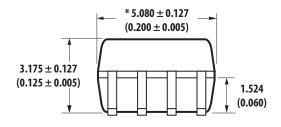

DIMENSIONS IN MILLIMETERS (INCHES). LEAD COPLANARITY = 0.10 mm (0.004 INCHES).

NOTE: FLOATING LEAD PROTRUSION IS 0.25 mm (10 mils) MAX.

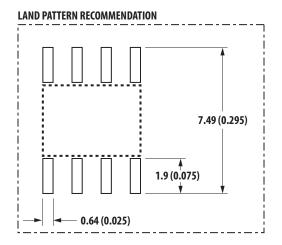

### Small Outline SO-8 Package (HCPL-0731/HCPL-0730)

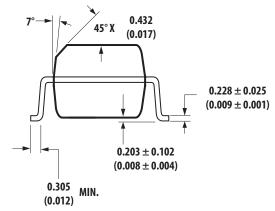

\* TOTAL PACKAGE LENGTH (INCLUSIVE OF MOLD FLASH) 5.207 ± 0.254 (0.205 ± 0.010)

DIMENSIONS IN MILLIMETERS (INCHES).
LEAD COPLANARITY = 0.10 mm (0.004 INCHES) MAX.

NOTE: FLOATING LEAD PROTRUSION IS 0.15 mm (6 mils) MAX.

### **Solder Reflow Thermal Profile**

### **Solder Reflow Profile**

Recommended reflow condition as per JEDEC Standard, J-STD-020 (latest revision). Non-halide flux should be used.

## **Regulatory Information**

The HCPL-2731/2730 have been approved by the following organizations.

| UL                      | Recognized under UL 1577, Component Recognition Program, File E55361. |
|-------------------------|---|
| CSA                     | Approved under CSA Component Acceptance Notice #5, File CA 88324.     |
| IEC/EN/DIN EN 60747-5-5 | Option 060 only   |

## Insulation-Related Specifications (HCPL-2731/2730/0731/0730)

| Parameter  | Symbol | 8-Pin DIP<br>(300 Mil) Value | SO-8 Value | Units | Conditions   |
|--|--------|------------------------------|------------|-------|--|
| Minimum External Air Gap (External Clearance)        | L(101) | 7.1                          | 4.9        | mm    | Measured from input terminals to output terminals, shortest distance through air.  |
| Minimum External Tracking (External Creepage)        | L(102) | 7.4                          | 4.8        | mm    | Measured from input terminals to output terminals, shortest distance path along body.  |
| Minimum Internal Plastic Gap<br>(Internal Clearance) |        | 0.08                         | 0.08       | mm    | Through insulation distance, conductor to conductor, usually the direct distance between the photoemitter and photodetector inside the optocoupler cavity. |
| Tracking Resistance (Comparative Tracking Index)     | CTI    | 200                          | 200        | Volts | DIN IEC 112/ VDE 0303 Part 1   |
| Isolation Group                                      |        | IIIa                         | Illa       |       | Material Group DIN VDE 0110  |

Option 300 - Surface mount classification is Class A in accordance with CECC 00802.

a. Refer to the front of the optocoupler section of the current catalog, under Product Safety Regulations section, IEC/EN/DIN EN 60747-5-5, for a detailed description.

**NOTE:** Isolation characteristics are guaranteed only within the safety maximum ratings which must be ensured by protective circuits in application

## **Absolute Maximum Ratings**

No derating required up to 85°C.

a. All typical values at  $T_A$  = 25°C and  $V_{CC}$  = 5V, unless otherwise noted.

NOTE: Use of a 0.1-µF bypass capacitor connected between pins 5 and 8 adjacent to the device is recommended.

b. Each channel.

### **Switching Specifications (AC)**

Over recommended operating conditions ( $T_A = 0$ °C to 70°C),  $V_{CC} = 5V$ , unless otherwise specified. (See note.)

| Common Mode<br>at Logic Low<br>Level Output | CM <sub>L</sub>    |                 | 1000   | 10000             | _    | V/µs  | I <sub>F</sub> = 1.6 mA, 7<br> V <sub>CM</sub>   = 10 V <sub>p</sub> | $T_A = 25^{\circ}\text{C}, \text{ RI} = 2.2 \text{ k}\Omega,$ |          |      |  |  |  |

- a. All typical values at  $T_A$  = 25°C and  $V_{CC}$  = 5V, unless otherwise noted.
- b. Each channel.
- c. Common mode transient immunity in a Logic High level is the maximum tolerable (positive)  $dV_{CM}/dt$  of the common mode pulse,  $V_{CM}$ , to assure that the output will remain in a Logic High state (that is,  $V_O > 2.0V$ ). Common mode transient immunity in a Logic Low level is the maximum tolerable (negative)  $dV_{CM}/dt$  of the common mode pulse,  $V_{CM}$ , to assure that the output will remain in a Logic Low state (that is,  $V_O < 0.8V$ ).
- d. In applications where dV/dt may exceed 50,000 V/ $\mu$ s (such as static discharge) a series resistor, R<sub>CC</sub>, should be included to protect the detector IC from destructively high surge currents. The recommended value is R<sub>CC</sub> = 110 $\Omega$ .

NOTE: Use of a 0.1-µF bypass capacitor connected between pins 5 and 8 adjacent to the device is recommended.

- a. All Typical values at T<sub>A</sub> = 25°C unless otherwise noted.
- b. The Input-Output Momentary Withstand Voltage is a dielectric voltage rating that should not be interpreted as an input-output continuous voltage rating. For the continuous voltage rating refer to the IEC/EN/DIN EN 60747-5-5 Insulation Characteristics Table (if applicable), your equipment level safety specification or Broadcom Application Note 1074, "Optocoupler Input-Output Endurance Voltage."
- c. Device considered a two-terminal device: pins 1, 2, 3, and 4 shorted together, and pins 5, 6, 7, and 8 shorted together.
- d. In accordance with UL 1577, each optocoupler is proof tested by applying an insulation test voltage > 4500 Vrms for 1 second (leakage detection current limit, I<sub>LO</sub> < 5 μA)</li>
- e. In accordance with UL 1577, each optocoupler is proof tested by applying an insulation test voltage > 6000 Vrms for 1 second (leakage detection current limit, I<sub>LO</sub> < 5 μA).
- f. Measured between the LED anode and cathode shorted together and pins 5 through 8 shorted together.
- g. Measured between pins 1 and 2 shorted together, and pins 3 and 4 shorted together.
