

# **Low Power Low Offset Voltage Dual Comparators**

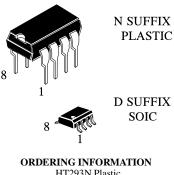

#### 1. DESCRIPTION

The HT293 consists of two independent precision voltage comparators with an offset voltage specification as low as 2.0 mV max for two comparators which were designed specifically to operate from a single power supply over a wide range of voltages.

Application areas include limit comparators, simple analog to digital converters; pulse, square wave and time delay generators; wide range VCO; MOS clock timers; multi-vibrators and high voltage digital logic gates.

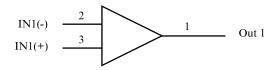

#### 2. FEATURES

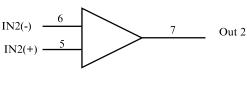

- Single or Split Supply Operation
- Low Input Bias Current
- Low Input Offset Current
- Input Common Mode Voltage Range to Gnd
- Low Output Saturation Voltage
- TTL and CMOS Compatible

ORDERING INFORMATION
HT293N Plastic
HT293R SOIC
T<sub>A</sub> =-40° to 85° C for all packages.

<sup>\*</sup>Maximum Ratings are those values beyond which damage to the device may occur. Functional operation should be restricted to the Recommended Operating Conditions.

#### Notes:

- 1. Split Power Supplies.
- 2.  $V_{IN}$ <-0.3V. This input current will only exist when voltage at any of the input leads is driven negative.

#### 4. RECOMMENDED OPERATING CONDITIONS

| Symbol   | Parameter                                | Min         | Max       | Unit |
|----------|--|-------------|-----------|------|
| $V_{CC}$ | DC Supply Voltage                        | ±2.5 or 5.0 | ±15 or 30 | V    |
| $T_{A}$  | Operating Temperature, All Package Types | -40         | +85       | °C   |

This device contains protection circuitry to guard against damage due to high static voltages or electric fields. However, precautions must be taken to avoid applications of any voltage higher than maximum rated voltages to this high-impedance circuit. For proper operation,  $V_{IN}$  and  $V_{OUT}$  should be constrained to the range  $GND \le (V_{IN} \text{ or } V_{OUT}) \le V_{CC}$ .

Unused inputs must always be tied to an appropriate logic voltage level (e.g., either GND or  $V_{CC}$ ). Unused outputs must be left open.
