NOTE :

1. An initial pause of 200 μ s is required after power-up followed by 8 RAS cycles before proper device operation is achieved. In case of using internal refresh counter, a minimum of 8 CAS-before-RAS initialization cycles instead of 8 RAS-only refresh cycles are required. The device should carefully initialized to be prevented from being entered into multi bit test mode.
2. If RAS= Vss during power-up, the HYM536810A could begin an active cycle. This condition results in higher power-up current than necessary demands from the power-up. It is recommended that RAS and CAS track with Vcc during power-up or be held at a valid VIH in order to minimize the power-up current.
3. VIH(min.) and VIL(max.) are reference levels for measuring timing of input signals. Transition time is measured between VIH and VIL and assumed to be 5ns for all inputs.
4. Refer to the HY5117400A and HY514100A data sheet for detailed information.
5. Measured with a load equivalent to 2 TTL loads and 100pF.
6. tOFF(max.) defines the time at which the output achieves the open circuit condition and is not referenced to output voltage levels.
7. Either tRCH or tRRH must be satisfied for a read cycle.
8. These parameters are referenced to CAS leading edge in early write cycles.
9. twcs is not a restrictive operating parameter. It is included in the data sheet as electrical characteristics only. If twcs $\geq$ twcs(min.), the cycle is an early write cycle and data out pin will remain open circuit (high impedance) through the entire cycle.
10. Operation within the tRCD(max.) limit insures that tRAC(max.) can be met. tRCD(max.) is specified as a reference point only. If tRCD is greater than the specified tRCD(max.) limit, then access time is controlled by tCAC.
11. Operation within the tRAD(max.) limit insures that tRAC(max.) can be met. tRAD(max.) is specified as a reference point only. If tRAD is greater than the specified tRAD(max.) limit, then access time is controlled by tAA.
12. tREF(max.)= 256ms is applied to L-part only (HYM536810ALM, HYM536810ALTM, HYM536810ALMG and HYM536810ALTMG).
