## HEXFET® Power MOSFET

$$V_{DS} = 1000V$$

$$R_{DS(on)} = 2.0\Omega$$

$$I_D = 6.1A$$

### Description

Third Generation HEXFETs from International Rectifier provide the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost-effectiveness.

The TO-247 package is preferred for commercial-industrial applications where higher power levels preclude the use of TO-220 devices. The TO-247 is similar but superior to the earlier TO-218 package because of its isolated mounting hole. It also provides greater creepage distance between pins to meet the requirements of most safety specifications.

### Absolute Maximum Ratings

|                             | Parameter                                           | Max.                  | Units |
|-----------------------------|-----------------------------------------------------|-----------------------|-------|
| $I_D$ @ $T_C = 25^\circ C$  | Continuous Drain Current, $V_{GS}$ @ 10 V           | 6.1                   | A     |
| $I_D$ @ $T_C = 100^\circ C$ | Continuous Drain Current, $V_{GS}$ @ 10 V           | 3.9                   |       |
| $I_{DM}$                    | Pulsed Drain Current ①                              | 24                    |       |
| $P_D$ @ $T_C = 25^\circ C$  | Power Dissipation                                   | 190                   | W     |
|                             | Linear Derating Factor                              | 1.5                   | W/°C  |
| $V_{GS}$                    | Gate-to-Source Voltage                              | ±20                   | V     |
| $E_{AS}$                    | Single Pulse Avalanche Energy ②                     | 800                   | mJ    |

## Source-Drain Ratings and Characteristics

|          | Parameter                              | Min.                                                                      | Typ. | Max. | Units   | Test Conditions                                                |
|----------|----------------------------------------|---------------------------------------------------------------------------|------|------|---------|----------------------------------------------------------------|
| $I_S$    | Continuous Source Current (Body Diode) | —                                                                         | —    | 6.1  | A       | MOSFET symbol showing the integral reverse p-n junction diode. |
| $I_{SM}$ | Pulsed Source Current (Body Diode) ①   | —                                                                         | —    | 24   |         |                                                                |
| $V_{SD}$ | Diode Forward Voltage                  | —                                                                         | —    | 1.8  | V       | $T_J=25^\circ\text{C}$ , $I_S=6.1A$ , $V_{GS}=0V$ ④            |
| $t_{rr}$ | Reverse Recovery Time                  | —                                                                         | 630  | 950  | ns      | $T_J=25^\circ\text{C}$ , $I_F=6.1A$                            |
| $Q_{rr}$ | Reverse Recovery Charge                | —                                                                         | 3.5  | 5.3  | $\mu C$ | $di/dt=100A/\mu s$ ④                                           |
| $t_{on}$ | Forward Turn-On Time                   | Intrinsic turn-on time is negligible (turn-on is dominated by $L_S+L_D$ ) |      |      |         |                                                                |

## Notes:

- ① Repetitive rating; pulse width limited by max. junction temperature (See Figure 11)
- ②  $V_{DD}=50V$ , starting  $T_J=25^\circ\text{C}$ ,  $L=40\text{mH}$ ,  $R_G=25\Omega$ ,  $I_{AS}=6.1A$  (See Figure 12)
- ③  $I_{SD}\leq 6.1A$ ,  $di/dt\leq 120A/\mu s$ ,  $V_{DD}\leq 600$ ,  $T_J\leq 150^\circ\text{C}$
- ④ Pulse width  $\leq 300\mu s$ ; duty cycle  $\leq 2\%$ .
