

# International IR Rectifier

INSULATED GATE BIPOLAR TRANSISTOR

PD -90715B

## IRGMC30U

Ultra Fast Speed IGBT

### Features

- Electrically Isolated and Hermetically Sealed
- Simple Drive Requirements
- Latch-proof
- Fast Speed operation > 10 kHz
- Switching-loss rating includes all "tail" losses

$$V_{CES} = 600V$$

$$V_{CE(on) \max} = 3.0V$$

$$@ V_{GE} = 15V, I_C = 8.0A$$

### Description

Insulated Gate Bipolar Transistors (IGBTs) from International Rectifier have higher usable current densities than comparable bipolar transistors, while at the same time having simpler gate-drive requirements of the familiar power MOSFET. They provide substantial benefits to a host of high-voltage, high-current applications.

The performance of various IGBTs varies greatly with frequency. Note that IR now provides the designer with a speed benchmark ( $f_{IC/2}$ , or the "half-current frequency"), as well as an indication of the current handling capability of the device.

TO-254AA

### Absolute Maximum Ratings

|                           | Parameter                              | Max.                                   | Units      |
|---------------------------|----------------------------------------|----------------------------------------|------------|
