

JC34063 series

1.5A DC TO DC
CONVERTER CONTROL

Description

JC34063 series have all the functions required for DC-to-DC converters: an internal Temperature-compensated reference, comparator, controlled duty cycle oscillator with an active current limit circuit, driver, and high current output switch.

JC34063 series are designed for step-down, step-up and voltage-inverting applications by using a minimum number of external components.

For JC34063E can operate for a temperature range from -40°C to 125°C while JC34063F can operate from -25°C to 85°C.

Features

- ◆ 3.0V to 40V Input
- ◆ Adjustable Output Voltage
- ◆ Output Switch Current to 1.5A
- ◆ Low Standby Current
- ◆ Operating Frequency to 100kHz
- ◆ Precision 1 % Reference available

Application

- CD-ROM
- Motherboards
- SMPS Power Supply
- Battery Chargers
- DSL Modem

Note 2. Low duty cycle pulse techniques are used during test to maintain junction temperature as close to ambient as possible.

Note 3. If the output switch is driven into hard saturation (non-Darlington configuration) at low switch currents ($\leq 300mA$) and high driver currents ($\geq 30mA$), it may take up to 2.0 ms for it to come out of saturation. This condition will shorten the off time at frequencies 30 kHz, and is magnified at high temperatures. This condition does not occur with a Darlington configuration, since the output switch cannot saturate. If a non-Darlington configuration is used, the following output drive condition is recommended:

Forced β of output switch:

$$\frac{I_{c \text{ output}}}{I_{c \text{ driver}} - 7.0 \text{ mA}^*} \geq 10$$

* The 100 Ω resistor in the emitter of the driver device requires about 7.0 mA before the output switch conducts.

Note:

Pb-free products:

- ◆ RoHS compliant and compatible with the current requirements of IPC/JEDEC J-STD-020.
- ◆ Suitable for use in Pb-free soldering processes with 100% matte tin (Sn) plating.

Green products:

- ◆ Lead-free (RoHS compliant)
- ◆ Halogen free (Br or Cl does not exceed 900ppm by weight in homogeneous material and total of Br and Cl does not exceed 1500ppm by weight)
