

**7-UNIT 500mA DARLINGTON TRANSISTOR ARRAY WITH CLAMP DIODE****DESCRIPTION**

The M54525P, 7-channel sink driver, consists of 14 NPN transistors connected to form high current gain driver pairs.

**FEATURES**

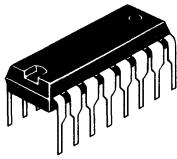

- High output sustaining voltage to 50V
- High output sink current to 500mA
- Integral diodes for transient suppression
- 24V PMOS compatible input
- Wide operating temperature range ( $T_a = -20 \sim +75^\circ\text{C}$ )

**APPLICATIONS**

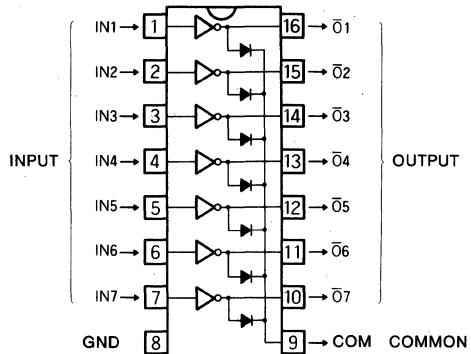

- Relay and printer driver
- LED or incandescent display digit driver
- Interfacing for standard MOS/BIPOLAR logics

**FUNCTION**

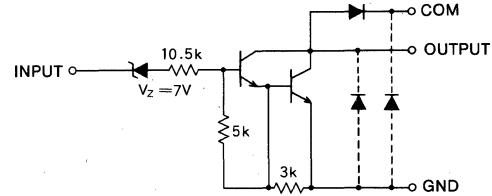

The M54525P is comprised of seven NPN darlington driver pairs. Each input has a Zener diode and 10.5k $\Omega$  resistor in series to limit the input current. Between pin 9 and each output, there are integral diodes for inductive load transient suppression. All emitters and the substrate are connected together to pin 8. The outputs are capable of sinking 500mA and will withstand 50V in the OFF state.

16-pin molded plastic DIL
