

DESCRIPTION

The M56753FP is a semiconductor IC developed as the motor driver used DVD, DVD-ROM, CD-ROM and CD Player.

This device include 2 channel BTL drivers and can drive 2 actuators with one IC at the same time.

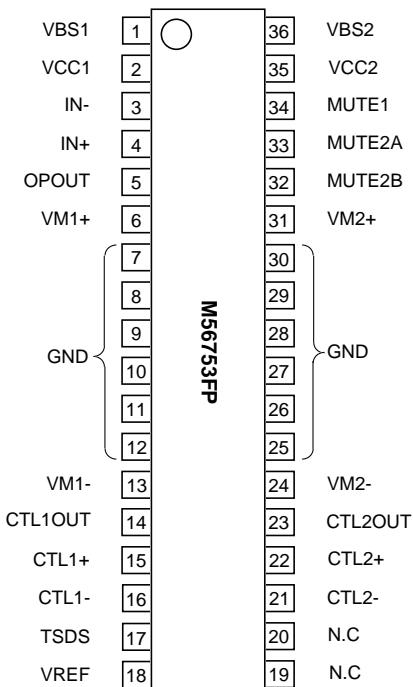

Also, the mute circuit, thermal protection circuit and VREF voltage monitor circuit functions are included.

FEATURES

- Low output saturation voltage (typ. 1.35V at 0.5A).
- Wide operating supply voltage range (4.5 to 15V).
- High current drive capability (maximum 0.9A).
- Low crossover distortion.
- High frequency capability.

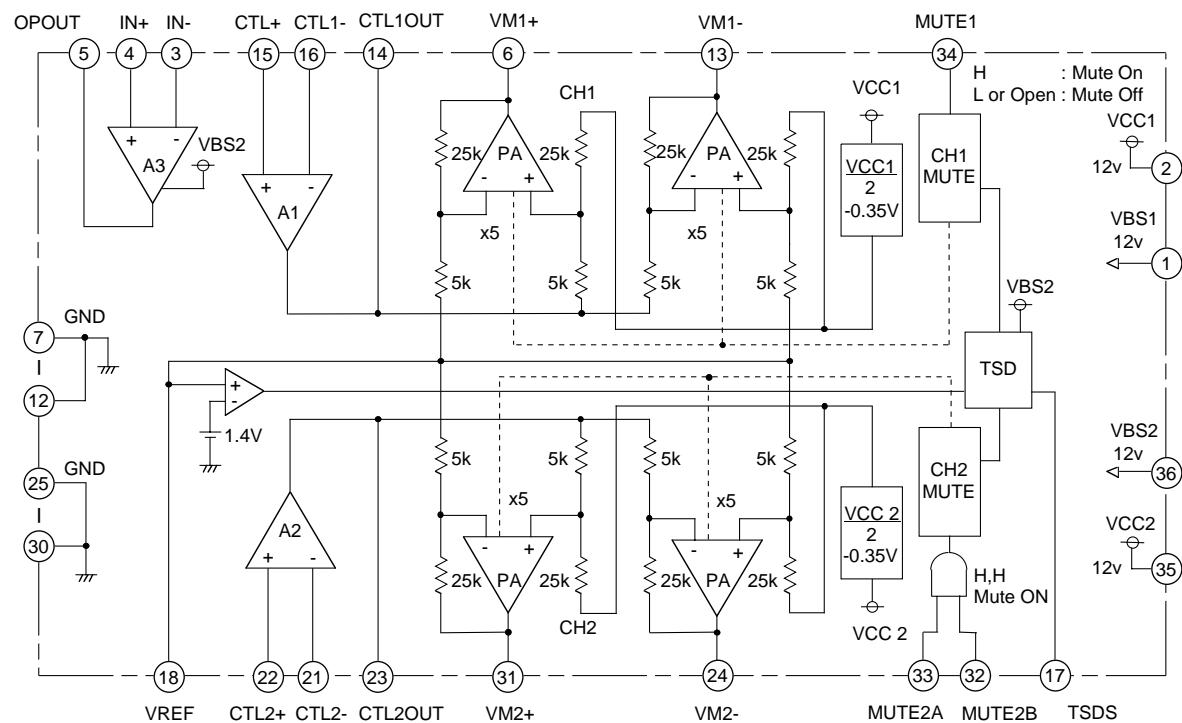

APPLICATION

DVD, DVD-ROM CD-ROM, CD PLAYER
