

Low Power Limiter Diodes

Rev. V4

Features

- Low Insertion Loss
- Fast Turn-on Time
- Wide Bandwidth
- RoHS* Compliant

Description

The MLP71xx Series limiter diodes are specially processed PIN diodes with thin intrinsic regions designed for use in passive or active limiters from 100 MHz to beyond 20 GHz. The different “I” region thicknesses and capacitances provide variable threshold and leakage power levels and power handling capability.

This rugged device is capable of reliable operation in military, commercial and industrial applications.

The MLP71xx Series is designed to be used in receiver protection applications.
