Advance Information

4Mb Ultra-Low Power Asynchronous CMOS SRAM

256K × 16 bit

Overview

The N04L163WC1C is an integrated memory device containing a 4 Mbit Static Random Access Memory organized as 262,144 words by 16 bits. The device is designed and fabricated using NanoAmp's advanced CMOS technology to provide both high-speed performance and ultra-low power. The device operates with a single chip enable ($\overline{CE}$) control and output enable ($\overline{OE}$) to allow for easy memory expansion. Byte controls ($\overline{UB}$ and $\overline{LB}$) allow the upper and lower bytes to be accessed independently. The N04L163WC1C is optimal for various applications where low-power is critical such as battery backup and hand-held devices. The device can operate over a very wide temperature range of -40°C to +85°C and is available in JEDEC standard packages compatible with other standard 256Kb x 16 SRAMs.

H	X	X	X	X	High Z	Standby[2]	Standby
X	X	X	H	H	High Z	Standby[2]	Standby
L	L	X[3]	L[1]	L[1]	Data In	Write[3]	Active
L	H	L	L[1]	L[1]	Data Out	Read	Active
L	H	H	L[1]	L[1]	High Z	Active	Active

1. When $\overline{UB}$ and $\overline{LB}$ are in select mode (low), I/O_0 - I/O_{15} are affected as shown. When $\overline{LB}$ only is in the select mode only I/O_0 - I/O_7 are affected as shown. When $\overline{UB}$ is in the select mode only I/O_8 - I/O_{15} are affected as shown.
2. When the device is in standby mode, control inputs ($\overline{WE}$, $\overline{OE}$, $\overline{UB}$, and $\overline{LB}$), address inputs and data input/outputs are internally isolated from any external influence and disabled from exerting any influence externally.
3. When $\overline{WE}$ is invoked, the $\overline{OE}$ input is internally disabled and has no effect on the circuit.

This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operating section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.
