**NFS110 Series** 

Single & quad output

**Total Power:** 80 - 110 W **Input Voltage:** 85 - 264 Vac

120 - 370 Vdc

# of Outputs: Single, quad

Rev. 06.30.09\_69 NFS110 Series 1 of 5

## **Special Features**

- 7.0 x 4.25 x 1.8 inch package
- Overvoltage and short circuit protection
- 110 W with 20 CFM
- Adjustable outputs
- EN55022, EN55011 conducted emissions level B
- UL, VDE and CSA safety approvals
- CE mark
- Available RoHS compliant
- 2 year warranty

# Safety

- VDE0805/EN60950/
- IEC950/IEC1010 File No. 10401-3336-0213
- Licence No. 4001467 7
- UL1950 File No. E132002
- CSA C22.2 No. 950 File No. LR41062C

- Convection cooled, 80 W maximum.
- Peak outputs lasting less than 60 seconds with duty cycle less than 10%. Total peak power must not exceed 110 W.
- Forced air, 20 CFM at 1 atmosphere, 110 W maximum.
- Figure is peak-to-peak. Output ripple is measured across a 50 MHz bandwidth using a 12 inch twisted pair terminated with a 47 µF capacitor.
- Total regulation is defined as the static output regulation at 25 °C, including initial tolerance, line voltage within stated limits and output voltages adjusted to their factory settings.
- To achieve stated regulation on the 24 V output on the NFS110-7602PJ, the following load condition must be true:  $I_A / I_B \le 5$ , where:
  - $I_A = +5.\overline{1} \text{ V}$  output current, and

  - I<sub>B</sub> = +24 V output current
    The +24 V output will maintain ±5.0% regulation under the following additional condition:  $I_A \le 5 A$ .
- Single output models have floating outputs which may be referenced as either positive or negative. Higher voltage supplies may be adjusted over a wide output voltage range, as long as the total output power does not exceed 80 Watts (natural convection) or 110 Watts (forced air).
- Power fail detect not available on single output models.
- Derating curve is application specific for ambient temperatures >50 °C, for optimum reliability no part of the heatsink should exceed 90 °C and no semiconductor case temperature should exceed 100 °C.
- 10 Caution: Allow a minimum of 1 second after disconnecting the power when making thermal measurements.
- 11 Three orthogonal axes, random vibration, 10 minute test for each axis.
- 12 This product is only for inclusion by professional installers within other equipment and must not be operated as a stand alone product.
- 13 Artesyn Technologies recommends a minimum load of 11 W to achieve the design MTBF. See the derating curve on page 3.
- 14 The 'J' suffix indicates that these parts are Pb-free (RoHS 6/6) compliant.
- 15 NOTICE: Some models do not support all options. Please contact your local Emerson Network Power representative or use the on-line model number search tool at http://www.PowerConversion.com to find a suitable alternative.

#### AC (J1) mating connector

Molex 09-50-3051 or Molex 09-91-0500 mating connector with 2478 or equivalent crimp terminals.

#### DC (J2) mating connector

Molex 09-50-3131 or Molex 09-91-1300 mating connector with 2478 or equivalent crimp terminals.

Power fail detect signal (Note 8)  $50ms \le T1 \le 200ms$  72 will vary with line and load  $73 \ge 3ms$  Pout: 110W PFD output is an open collector which will  $sink \le 40mA$  in the low state.

#### Mechanical Notes:

- A Metallic or non-metallic stand-offs (maximum diameter 5.4mm) can be used in all four mounting holes without effecting safety approval.
- B The ground pad of the mounting hole near J1, allows system grounding through a metal stand-off to the system chassis.
- C The heat sink is grounded, and allows system grounding by mechanical connection to the system
- **D** The supply must be mechanically supported using the PCB mounting holes and may be additionally supported by the heatsink mounting holes.
- E It is always advisable to attach the power supply heat sink to another thermal dissipator (such as a chassis or finned heatsink etc). The resulting decrease in heat sink mounted component temperatures will improve power supply lifetime.
- F A standard L-bracket and cover is available for mounting which contains all screws, connectors and necessary mounting hardware. The kit is available, order part number "NFS110CJ".
