Care and Maintenance

- For applications other than air cylinder consult factory.
- Joint is not suitable for rotation applications.
- Cannot be reused after dismantling.
- NJ floating joints are sealed and pre-lubricated.
- Ambient temperature range 40° to 140°F (5° to 60°C).
- Unscrew joint 1 or 2 turns from the end of the rod thread.
- Do not exceed an axial misalignment of 5°.
- Do not exceed an allowable eccentricity or the life of the joint could be shortened.
