## **SMT** Power Inductors

High Current Molded Power Inductor - PA4341.XXXNLT & PM4341.XXXNLT

- *P* Height: 3.0mm Max
- *P* **Footprint:** 7.6mm x 6.9mm Max
- *Current Rating:* up to 32.5A
- *P* Inductance Range: 0.1uH to 47.0uH
- 🕐 Shielded construction and compact design
- *P* High current, low DCR, and high efficiency
- *P* Minimized acoustic noise and minimized leakage flux
- 🕐 200Vdc Isolation between terminal and core

| Electrical Specifications @ 25°C - Operating Temperature -55°C to +125°C |                           |                         |         |               |      |            |  |

## Notes:

- 1. Actual temperature of the component during system operation (ambient plus temperature rise) must be within the standard operating range.
- The saturation current is the current at which the initial inductance drops approximately 30% at the stated ambient temperature. This current is determined by placing the compnent in the specified ambient environment and applying a short duration pulse current (to eliminate self-heating effect) to the component.
- 3. The rated current is the DC current required to raise the component temperature by approximately 40°C. Take note that the components' performanc varies depending on the system condition. It is suggested that the component be tested at the system level, to verify the temperature rise of the component during system operation.
- 4. The part temperature (ambient+temp rise) should not exceed 125°C under worst case operating conditions. Circuit design, PCB trace size and thickness, airflow and

other cooling provisions all affect the part temperature. Part temperature should be verified in the end application.

- 5. Please note that the inductance tolerance of all parts are ±20%, except .101NLT, .151NLT , .161NLT, .201NLT, and .221NLT which are ±30%.
- 6. Parts shown in bold are standard catalog parts and are available through sample stock and distribution. Parts in lighter font are available but are not necessarily held in sample stock or distribution and lead times may be longer. Please contact Pulse for availablity.
- The PA4341.XXXNLT and PM4341.XXXNLT are both AEC-Q200 qualified. The PM4341. XXXNLT part numbers are also IATF16949 certified. The mechanical dimensions are 100% tested in production but do not necessarily meet a product capability index (Cpk) 1.33 and therefore the PM4341.XXXNLT may not strictly conform to PPAP.

All Dimensions in mm.
