

# PSMN1R2-25YL

## N-channel 25 V 1.2 mΩ logic level MOSFET in LFPAK

Rev. 01 — 25 June 2009

Product data sheet

## 1. Product profile

### 1.1 General description

Logic level N-channel MOSFET in LFPAK package qualified to 150 °C. This product is designed and qualified for use in a wide range of industrial, communications and domestic equipment.

### 1.2 Features and benefits

- Advanced TrenchMOS provides low RDSon and low gate charge
- High efficiency gains in switching power converters
- Improved mechanical and thermal characteristics
- LFPAK provides maximum power density in a Power SO8 package

### 1.3 Applications

- DC-to-DC converters
- Lithium-ion battery protection
- Load switching
- Motor control
- Server power supplies

### 1.4 Quick reference data

Table 1. Quick reference

| Symbol                         | Parameter                                    | Conditions  | Min | Typ  | Max | Unit |

## 2. Pinning information

Table 2. Pinning information

| Pin | Symbol | Description | Simplified outline  | Graphic symbol  |
|-----|--------|-------------|---|---|
| 1   | S      | source      |  |  |
| 2   | S      | source      |   |   |
| 3   | S      | source      |   |   |
| 4   | G      | gate        |   |   |
| mb  | D      | drain       |   |   |
|     |        |             | <b>SOT1023<br/>(LPAK2)</b>  |   |

## 3. Ordering information

Table 3. Ordering information

| Type number  | Package |   | Version |
|--------------|---------|---|---------|
|              | Name    | Description   |         |
| PSMN1R2-25YL | LPAK2   | Plastic single-end surface-mounted package (LPAK2); 4 leads | SOT1023 |

## 4. Limiting values

**Table 4. Limiting values**

In accordance with the Absolute Maximum Rating System (IEC 60134).

| Symbol              | Parameter                  | Conditions  | Min | Max | Unit |   |
|---------------------|----------------------------|---|-----|-----|------|---|
| V <sub>DS</sub>     | drain-source voltage       | T <sub>j</sub> ≥ 25 °C; T <sub>j</sub> ≤ 150 °C                                       | -   | 25  | V    |   |
| V <sub>DGR</sub>    | drain-gate voltage         | T <sub>j</sub> ≥ 25 °C; T <sub>j</sub> ≤ 150 °C; R <sub>GS</sub> = 20 kΩ              | -   | 25  | V    |   |
| V <sub>GS</sub>     | gate-source voltage        |   | -20 | 20  | V    |   |
| I <sub>D</sub>      | drain current              | V <sub>GS</sub> = 10 V; T <sub>mb</sub> = 100 °C; see <a href="#">Figure 1</a>        | [1] | -   | 100  | A |
|                     |                            | V <sub>GS</sub> = 10 V; T <sub>mb</sub> = 25 °C; see <a href="#">Figure 1</a>         | [1] | -   | 100  | A |
| I <sub>DM</sub>     | peak drain current         | t <sub>p</sub> ≤ 10 μs; pulsed; T <sub>mb</sub> = 25 °C; see <a href="#">Figure 3</a> | -   | 815 | A    |   |
| P <sub>tot</sub>    | total power dissipation    | T <sub>mb</sub> = 25 °C; see <a href="#">Figure 2</a>                                 | -   | 121 | W    |   |
| T <sub>stg</sub>    | storage temperature        |   | -55 | 150 | °C   |   |
| T <sub>j</sub>      | junction temperature       |   | -55 | 150 | °C   |   |
| T <sub>sld(M)</sub> | peak soldering temperature |   | -   | 260 | °C   |   |

### Source-drain diode

|          |                     |  |     |   |     |   |
|----------|---------------------|--|-----|---|-----|---|
| $I_S$    | source current      | $T_{mb} = 25\text{ °C}$ ;  | [1] | - | 100 | A |
| $I_{SM}$ | peak source current | $t_p \leq 10\text{ }\mu\text{s}$ ; pulsed; $T_{mb} = 25\text{ °C}$ | -   | - | 815 | A |

### Avalanche ruggedness

|               |  |  |   |   |     |    |
|---------------|--|--|---|---|-----|----|
| $E_{DS(AL)S}$ | non-repetitive drain-source avalanche energy | $V_{GS} = 10\text{ V}$ ; $T_{j(\text{init})} = 25\text{ °C}$ ; $I_D = 100\text{ A}$ ; $V_{sup} \leq 25\text{ V}$ ; $R_{GS} = 50\text{ }\Omega$ ; unclamped | - | - | 677 | mJ |
|---------------|--|--|---|---|-----|----|

[1] Continuous current is limited by package.

$V_{GS} \geq 5\text{ V}$ (1) Capped at 100A due to package

**Fig 1. Continuous drain current as a function of mounting base temperature**

$$P_{der} = \frac{P_{tot}}{P_{tot(25^\circ\text{C})}} \times 100\%$$

**Fig 2. Normalized total power dissipation as a function of mounting base temperature**

$T_{sp} = 25^{\circ}C$ ;  $I_{DM}$  is single pulse capped at 100A due to package

Fig 3. Safe operating area; continuous and peak drain currents as a function of drain-source voltage

5. Thermal characteristics

Table 5. Thermal characteristics

| Symbol         | Parameter   | Conditions                   | Min | Typ | Max | Unit |
|----------------|---|------------------------------|-----|-----|-----|------|
| $R_{th(j-mb)}$ | thermal resistance from junction to mounting base | see <a href="#">Figure 4</a> | -   | 0.4 | 1   | K/W  |

Fig 4. Transient thermal impedance from junction to mounting base as a function of pulse duration

## 6. Characteristics

**Table 6. Characteristics**

| Symbol                         | Parameter                         | Conditions   | Min  | Typ  | Max  | Unit    |
|--------------------------------|-----------------------------------|--|------|------|------|---------|
| <b>Static characteristics</b>  |                                   |  |      |      |      |         |

| Preliminary [short] data sheet    | Qualification                 | This document contains data from the preliminary specification.                       |
| Product [short] data sheet        | Production                    | This document contains the product specification.                                     |

[1] Please consult the most recently issued document before initiating or completing a design.

[2] The term 'short data sheet' is explained in section "Definitions".

[3] The product status of device(s) described in this document may have changed since this document was published and may differ in case of multiple devices. The latest product status information is available on the Internet at URL <http://www.nxp.com>.

### 9.2 Definitions

**Draft** — The document is a draft version only. The content is still under internal review and subject to formal approval, which may result in modifications or additions. NXP Semiconductors does not give any representations or warranties as to the accuracy or completeness of information included herein and shall have no liability for the consequences of use of such information.

**Short data sheet** — A short data sheet is an extract from a full data sheet with the same product type number(s) and title. A short data sheet is intended for quick reference only and should not be relied upon to contain detailed and full information. For detailed and full information see the relevant full data sheet, which is available on request via the local NXP Semiconductors sales office. In case of any inconsistency or conflict with the short data sheet, the full data sheet shall prevail.

### 9.3 Disclaimers

**General** — Information in this document is believed to be accurate and reliable. However, NXP Semiconductors does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information.

**Right to make changes** — NXP Semiconductors reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

**Suitability for use** — NXP Semiconductors products are not designed, authorized or warranted to be suitable for use in medical, military, aircraft, space or life support equipment, nor in applications where failure or malfunction of an NXP Semiconductors product can reasonably be expected to result in personal injury, death or severe property or environmental damage. NXP Semiconductors accepts no liability for inclusion and/or use of NXP Semiconductors products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk.

**Applications** — Applications that are described herein for any of these products are for illustrative purposes only. NXP Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

**Quick reference data** — The Quick reference data is an extract of the product data given in the Limiting values and Characteristics sections of this document, and as such is not complete, exhaustive or legally binding.

**Limiting values** — Stress above one or more limiting values (as defined in the Absolute Maximum Ratings System of IEC 60134) may cause permanent damage to the device. Limiting values are stress ratings only and operation of the device at these or any other conditions above those given in the Characteristics sections of this document is not implied. Exposure to limiting values for extended periods may affect device reliability.

**Terms and conditions of sale** — NXP Semiconductors products are sold subject to the general terms and conditions of commercial sale, as published at <http://www.nxp.com/profile/terms>, including those pertaining to warranty, intellectual property rights infringement and limitation of liability, unless explicitly otherwise agreed to in writing by NXP Semiconductors. In case of any inconsistency or conflict between information in this document and such terms and conditions, the latter will prevail.

**No offer to sell or license** — Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights.

**Export control** — This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from national authorities.
