1040 VIENNA WIEDNER HAUPTSTRASSE 76 TEL. +43 I 586 52 43 -0, FAX. -44, OFFICE@ROITHNER-LASER.COM

RLT1300-5G

AUSTRIA

TECHNICAL DATA

High Power Infrared Laser Diode

Features

Structure: GalnAsP/InP SQW strucutre

Peak Wavelength: single mode, typ. 1300 nm

Optical Ouput Power: 5 mW

Package: 9 mm

Electrical Connection

Pin Configuration			Bottom View	
10 03	n-type			2
1.5	PIN	Function		
LD PD	1	LD Cathode		}
	2	LD Anode, PD Cathode		1 3
	3	PD Anode		
02				

Absolute Maximum Ratings ($T_C=25$ °C)

Item	Symbol	Value	Unit
CW Output Power	Po	8	mW
Maximum LD Current	I _f	70	mA
LD Reverse Voltage	$U_{R(LD)}$	1.5	V
PD Reverse Voltage	$U_{R(PD)}$	6	V
Operating Case Temperature	T _C	-20 + 40	°C
Storage Temperature	T _{stq}	-40 +85	°C

Specifications ($T_C=25$ °C)

Item	Symbol	Condition	Min.	Тур.	Max.	Unit
Optical Specification						
CW Output Power	Po	CW	-	5	-	mW
Peak Wavelength	λ_{P}	$P_0 = 5 \text{ mW}$	1270	1300	1330	nm
FWHM Beam Divergence	θ∥	$P_0 = 5 \text{ mW}$	-	25	-	deg
	θΪ	$P_0 = 5 \text{ mW}$	-	40	-	deg
Emitting Aperature	WxH			1 x 5		μm
Electrical Specification						
Threshold Current	I _{th}	CW	-	35	-	mA
Operating Current	l _{op}	$P_0 = 5 \text{ mW}$	-	45	55	mA
Operating Voltage	U _{op}	$P_0 = 5 \text{ mW}$	-	2	-	V
Monitor Current	I _m	$P_0 = 5 \text{ mW}$	>20	500	1500	μA

The above specifications are for reference purpose only and subjected to change without prior notice.

Safety of Laser light

Laser Light can damage the human eyes and skin. Do not expose the eye or skin directly to any laser light and/or through optical lens. When handling the LDs, wear appropriate safety glasses to prevent laser light, even any reflections from entering to the eye. Focused laser beam through optical instruments will increase the chance of eye hazard.

These LDs are emitting invisible light.

Cautions

1. Operating methode

- This LD shall change its forward voltage requirement and optical ouput power according to temperature change. Also, the LD will require more operation current to maintain same ouput power as it degrades. In order to maintain output power, use of APC (Automatic Power Control) is recommended. Which use monitor feedback to adjust the operation current.
- Confirm that electrical spike current generated by switching on and off does not exceed the
 maximum operating current level specified herein above as absolute maximum rating. Also,
 employ appropriat countermeasures to reduce chattering and/or overshooting in the circuit.

2. Static Electricity

• Static electricity or electrical surges will reduce and degrade the reliability of the LDs. It is recommended to use a wrist trap or anti-electrostatic glove when handeling the product.

3. Absolute Maximum Rating

Active layer of LDs shall have high current density and generate high electric field during its
operation. In order to prevent excessive damage, the LD must be operated strictly below
absolute maximum rating.
