

20V Stepper Motor Driver

Description

The SA8548 is a dual-channel low saturation voltage forward, reverse, coast, break motor driver IC. It is optimal for motor drive in 12V system products and can drive a stepper motor in Full-step or two DC motor.

The output driver block of each H-bridge consists of N-channel power MOSFETs configured as an H- bridge to drive the motor windings. Each H-bridge includes circuitry to regulate or limit the winding current. Internal shutdown functions are provided for under-voltage lockout, over current protection and over temperature. A low-power sleep mode is also provided.

The SA8548 is available in a compact ESOP8 and SOP10 package.

Features

- VM max=22V, IO max = 1.2A
- $R_{DS(on)}$: 730-m Ω (HS + LS)
- H-Bridge Motor Driver
- Over current protection
- Over temperature protection
- UVLO protection
- Low-Power Sleep Mode
- ESOP10 Package

Applications

- Stage Lighting
- Refrigerator
- Vacuum Cleaner
- POS Printer
- Any Relevant Stepper Motor Applications.
