

CMOS LOW VOLTAGE GATE ARRAY

The SLA600L Series is a master slice CMOS gate array developed as a low voltage version of the SLA6000 Series. It covers 500 to 6,200 gates, the gate capacity range that is most demanded in the gate array market. Operating on low voltage, the SLA600L LSI can be applied to portable products. The SLA600L Series incorporates all of the advantages that ordinary gate arrays can provide, such as quick development and high system reliability. Changing the delay value of the SLA6000 Series MSI library enables the user to utilize all macro cells so that an SLA600L gate array system can be designed with the same technique as the SLA6000 Series.

- Eight items cover the wide range of scale from 513 to 6,206 gates.
- Operating voltage 1.8 to 3.5V
- Applicable to portable products
- Input/output CMOS compatible
- Even small orders for LSI will be accepted.
- Speedy development and delivery
