The SMT15C series is a new high density open-frame, non-isolated converter for space sensitive applications. Each model has a wide input range (4.5 Vdc to 5.5 Vdc or 10.2 Vdc to 13.8Vdc) and offers a wide 0.9 Vdc to 5.0 Vdc output voltage range with a 15 A load. An external resistor adjusts the output voltage from its pre-set value of 0.9 V to any value up to the 5 V maximum. Typical efficiencies for the models are 89% for the 5 V input version and 91% for the 12 V input version. The series offers remote ON/OFF and overcurrent protection as standard. With full international safety approvals including EN60950 and UL/cUL60950, the SMT15C reduces compliance costs and time to market.

- Power up is the time from application of dc input to POWER GOOD high. Remote ON/OFF asserted high to POWER GOOD high.
- This product is only for inclusion by professional installers within other equipment and must not be operated as a stand alone product.
- Reserved.
- Measured as per recommended set-up. $C_{in} = 270\text{ }\mu\text{F}$ (20mW ESR max.), $C_{out} = 680\text{ }\mu\text{F}$ (10 mW ESR max.).
- Uses external resistor from TRIM to ground. See Application Note 169 for details. Minimum value 485 μF for 5 V model, 280 μF for 12 V model.
- Signal line assumed <3 m in length.
- External input fusing recommended.
