

# Service Manual

SX-316-S

ORDER NO.  
**RRV3330**

AUDIO MULTI-CHANNEL RECEIVER

# SX-316-S

THIS MANUAL IS APPLICABLE TO THE FOLLOWING MODEL(S) AND TYPE(S).

| Model    | Type  | Power Requirement | Remarks |
|----------|-------|-------------------|---------|
| SX-316-S | KUCXJ | AC 120 V          |         |
| SX-316-S | MYXJ5 | AC 220 V to 230 V |         |

For details, refer to "Important Check Points for Good Servicing".

1234

# SAFETY INFORMATION

A

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual.

Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

B

**WARNING**

This product contains lead in solder and certain electrical parts contain chemicals which are known to the state of California to cause cancer, birth defects or other reproductive harm.

Health & Safety Code Section 25249.6 – Proposition 65

C

**NOTICE**

(FOR CANADIAN MODEL ONLY)

Fuse symbols  (fast operating fuse) and/or  (slow operating fuse) on PCB indicate that replacement parts must be of identical designation.

**REMARQUE**

(POUR MODÈLE CANADIEN SEULEMENT)

Les symboles de fusible  (fusible de type rapide) et/ou  (fusible de type lent) sur CCI indiquent que les pièces de remplacement doivent avoir la même désignation.

(FOR USA MODEL ONLY)

1. SAFETY PRECAUTIONS

The following check should be performed for the continued protection of the customer and service technician.

LEAKAGE CURRENT CHECK

Measure leakage current to a known earth ground (water pipe, conduit, etc.) by connecting a leakage current tester such as Simpson Model 229-2 or equivalent between the earth ground and all exposed metal parts of the appliance (input/output terminals, screwheads, metal overlays, control shaft, etc.). Plug the AC line cord of the appliance directly into a 120V AC 60 Hz outlet and turn the AC power switch on. Any current measured must not exceed 0.5 mA.

AC Leakage Test

ANY MEASUREMENTS NOT WITHIN THE LIMITS OUTLINED ABOVE ARE INDICATIVE OF A POTENTIAL SHOCK HAZARD AND MUST BE CORRECTED BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.

2. PRODUCT SAFETY NOTICE

Many electrical and mechanical parts in the appliance have special safety related characteristics. These are often not evident from visual inspection nor the protection afforded by them necessarily can be obtained by using replacement components rated for voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in this Service Manual.

Electrical components having such features are identified by marking with a ⚠ on the schematics and on the parts list in this Service Manual.

The use of a substitute replacement component which does not have the same safety characteristics as the PIONEER recommended replacement one, shown in the parts list in this Service Manual, may create shock, fire, or other hazards.

Product Safety is continuously under review and new instructions are issued from time to time. For the latest information, always consult the current PIONEER Service Manual. A subscription to, or additional copies of, PIONEER Service Manual may be obtained at a nominal charge from PIONEER.

## [Important Check Points for Good Servicing]

In this manual, procedures that must be performed during repairs are marked with the below symbol.  
Please be sure to confirm and follow these procedures.

### 1. Product safety

Please conform to product regulations (such as safety and radiation regulations), and maintain a safe servicing environment by following the safety instructions described in this manual.

- ① Use specified parts for repair.

Use genuine parts. Be sure to use important parts for safety.

- ② Do not perform modifications without proper instructions.

Please follow the specified safety methods when modification(addition/change of parts) is required due to interferences such as radio/TV interference and foreign noise.

- ③ Make sure the soldering of repaired locations is properly performed.

When you solder while repairing, please be sure that there are no cold solder and other debris.  
Soldering should be finished with the proper quantity. (Refer to the example)

- ④ Make sure the screws are tightly fastened.

Please be sure that all screws are fastened, and that there are no loose screws.

- ⑤ Make sure each connectors are correctly inserted.

Please be sure that all connectors are inserted, and that there are no imperfect insertion.

- ⑥ Make sure the wiring cables are set to their original state.

Please replace the wiring and cables to the original state after repairs.  
In addition, be sure that there are no pinched wires, etc.

- ⑦ Make sure screws and soldering scraps do not remain inside the product.

Please check that neither solder debris nor screws remain inside the product.

- ⑧ There should be no semi-broken wires, scratches, melting, etc. on the coating of the power cord.

Damaged power cords may lead to fire accidents, so please be sure that there are no damages.  
If you find a damaged power cord, please exchange it with a suitable one.

- ⑨ There should be no spark traces or similar marks on the power plug.

When spark traces or similar marks are found on the power supply plug, please check the connection and advise on secure connections and suitable usage. Please exchange the power cord if necessary.

- ⑩ Safe environment should be secured during servicing.

When you perform repairs, please pay attention to static electricity, furniture, household articles, etc. in order to prevent injuries.  
Please pay attention to your surroundings and repair safely.

### 2. Adjustments

To keep the original performance of the products, optimum adjustments and confirmation of characteristics within specification.  
Adjustments should be performed in accordance with the procedures/instructions described in this manual.

### 3. Lubricants, Glues, and Replacement parts

Use grease and adhesives that are equal to the specified substance.  
Make sure the proper amount is applied.

### 4. Cleaning

For parts that require cleaning, such as optical pickups, tape deck heads, lenses and mirrors used in projection monitors, proper cleaning should be performed to restore their performances.

### 5. Shipping mode and Shipping screws

To protect products from damages or failures during transit, the shipping mode should be set or the shipping screws should be installed before shipment. Please be sure to follow this method especially if it is specified in this manual.

# 1. SPECIFICATIONS

SX-316-S/KUCXJ

## Amplifier section

### Continuous power output

Front

..... 100 W per channel\* (200 Hz to 20 kHz, 0.7 %\*\*, 8 Ω)

Center ..... 100 W\*(200 Hz to 20 kHz, 0.7 %\*\*, 8 Ω)

Surround

..... 100 W per channel\*(200 Hz to 20 kHz, 0.7 %\*\*, 8 Ω)

Subwoofer ..... 100 W\*(45 Hz to 200 kHz, 0.7 %\*\*, 8 Ω)

### RMS Power Output

Front ..... 144 W per channel (1 kHz, THD, 10 %, 8 Ω)

Center ..... 144 W (1 kHz, THD, 10 %, 8 Ω)

Surround ..... 144 W per channel (1 kHz, THD, 10 %, 8 Ω)

Subwoofer ..... 144 W (1 kHz, THD, 10 %, 8 Ω)

\* Measured pursuant to the Federal Trade Commission's Trade Regulation rule on Power Output Claims for Amplifiers.

\*\* Measured by Audio Spectrum Analyzer.

## FM Tuner Section

Frequency Range ..... 87.5 MHz to 108 MHz

Antenna Input (DIN) ..... 75 Ω unbalanced

## AM Tuner Section

Frequency Range ..... 530 kHz to 1 700 kHz

Antenna ..... Loop antenna

## Miscellaneous

Power requirements ..... AC 120 V / 60 Hz

Power consumption ..... 320 W / 420 VA

In standby ..... 0.5 W

Dimensions

..... 16 9/16 in. (W) x 6 1/4 in. (H) x 13 11/16 in.(D)

420 mm (W) x 158 mm(H) x 348 mm(D)

Weight (without package) ..... 19.0 lb (8.6 kg)

## Furnished Parts

AM loop antenna..... 1

FM wire antenna..... 1

AA size IEC R6 dry cell batteries (to confirm system operation) ..... 2

Remote control ..... 1

Mini-plug audio cable ..... 1

Operating instructions

## Note

## Amplifier section

Continuous Power Output (stereo)

Front ..... 100 W (DIN 1 kHz, THD, 1.0 %, 8 Ω)

Power Output (surround)

Front

.... 100 W per channel (1 kHz, 1.0 % THD, 8 Ω)

Center ..... 100 W (1 kHz, 1.0 % THD, 8 Ω)

Surround ..... 100 W per channel (1 kHz, 1.0 % THD, 8 Ω)

Subwoofer .... 100 W (100 Hz, 1.0 % THD, 8 Ω)

### RMS Power Output

Front

.... 130 W per channel (1 kHz, 10 % THD, 8 Ω)

Center ..... 130 W (1 kHz, 10 % THD, 8 Ω)

Surround ..... 130 W per channel (1 kHz, 10 % THD, 8 Ω)

Subwoofer .... 130 W (100 Hz, 10 % THD, 8 Ω)

## FM Tuner Section

Frequency Range ..... 87.5 MHz to 108 MHz

Antenna Input. .... 75 Ω unbalanced

## AM Tuner Section

Frequency Range ..... 531 kHz to 1 602 kHz

Antenna ..... Loop antenna

## Miscellaneous

Power requirements

..... AC 220V to 230 V, 50 Hz/ 60 Hz

Power consumption..... 320 W

In standby..... 0.5 W

Dimensions

..... 420 mm (W) x 158 mm (H) x 348 mm (D)

Weight (without package)..... 8.5 kg

## Furnished Parts

AM loop antenna ..... 1

FM wire antenna ..... 1

AA size IEC R6 dry cell batteries (to confirm system operation)..... 2

Remote control..... 1

Warranty card..... 1

## 2. EXPLODED VIEWS AND PARTS LIST

NOTES:

- Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
- The  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Screws adjacent to ▼ mark on product are used for disassembly.
- For the applying amount of lubricants or glue, follow the instructions in this manual.  
(In the case of no amount instructions, apply as you think it appropriate.)

### 2.1 PACKING

## (1) PACKING SECTION PARTS LIST

| Mark No. | Description                                       | Part No.              | Mark No. | Description    | Part No.              |
|----------|---------------------------------------------------|-----------------------|----------|----------------|-----------------------|

## NOTE FOR PCB DIAGRAMS :

1. Part numbers in PCB diagrams match those in the schematic diagrams.
2. A comparison between the main parts of PCB and schematic diagrams is shown below.

| Symbol In PCB Diagrams                                                            | Symbol In Schematic Diagrams                                                      | Part Name                |
|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|--------------------------|
|  |  | Transistor               |
|  |  | Transistor with resistor |
|  |  | Field effect transistor  |
|  |  | Resistor array           |
|  |  | 3-terminal regulator     |

3. The parts mounted on this PCB include all necessary parts for several destinations.
- For further information for respective destinations, be sure to check with the schematic diagram.

# 5. PCB PARTS LIST

NOTES: ●Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.  
●The ⚠ mark found on some component parts indicates the importance of the safety factor of the part.  
Therefore, when replacing, be sure to use parts of identical designation.  
●When ordering resistors, first convert resistance values into code form as shown in the following examples.  
Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J=5%, and K=10%).  
560 Ω → 56 x 10<sup>1</sup> → 561 ..... RD1/4PU 5 6 1 J  
47k Ω → 47 x 10<sup>3</sup> → 473 ..... RD1/4PU 4 7 3 J  
0.5 Ω → R50 ..... RN2H R 5 0 K  
1 Ω → 1R0 ..... RS1P 1 R 0 K  
Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).  
5.62k Ω → 562 x 10<sup>1</sup> → 5621 ..... RN1/4PC 5 6 2 1 F  
● Meaning of the figures and others in the parentheses in the parts list.  
Example) IC 301 is on the point (face A, 91 of x-axis, and 111 of y-axis) of the corresponding PC board.  
IC 301 (A, 91, 111) IC NJM2068V

# 7. GENERAL INFORMATION

## 7.1 DIAGNOSIS

### 7.1.1 DISASSEMBLY

**Note:** Even if the unit shown in the photos and illustrations in this manual may differ from your product, the procedures described here are common.

1 Remove the top cover (five screws).

Diagram showing the internal components of the unit. Callouts include: ② x3 (screws), Heat Sink, ⑤ x1 (screw), ④ x3 (cable ties), and ② x2 (screws).

Two close-up diagrams showing the removal of a push rivet (③) and a screw (② x1) from the unit's chassis.

4 Cut 3 cable ties.

5 Remove PCB holder(one screw).

Diagram showing the rear panel of the unit. Callout: ⑥ x1 (screw).

Diagram showing the unit with the rear panel being pulled up. Callout: ⑦ Pull up (arrow), Rear Panel.

Note : The unit does not operate when the screws of Speaker Terminal are taken off from Rear Panel.

**Heat-sink caution when disassembling :** The Heat-sink becomes hot; please take care.

**Note:** Even if the unit shown in the photos and illustrations in this manual may differ from your product, the procedures described here are common.

# **• Pin Function**

| No. | Port           | Pin Name        | I/O | Pin Function                                                                                                   |
|-----|----------------|-----------------|-----|----------------------------------------------------------------------------------------------------------------|
| 51  | P43            | NECK_SEL        | I/O | For 8ohm spk impedance: "H" at Adv Surr,Standard,5.1Multich,speaker A+B(7ch model). For 6 ohm spk impedance: L |
| 52  | P42            | NC              | I/O |                                                                                                                |
| 53  | P41            | AMUTE           | I/O | System mute                                                                                                    |
| 54  | P40            | RY_B            | I/O | Speaker B relay-on / OFF at 916, 816 and 516. This RY_B is used for SW relay at 316.                           |
| 55  | P37            | RY_C/R          | I/O | Rear one / center relay-on / OFF                                                                               |
| 56  | P36            | RY_A            | I/O | Speaker A relay-on / OFF                                                                                       |
| 57  | P35            | NC              | I/O |                                                                                                                |
| 58  | P34            | RY-AC           | I/O | AC relay on/off                                                                                                |
| 59  | P33            | VIDEO4          | I/O | NJM2296 control (VIDEO input select) (SX316 no connect)                                                        |
| 60  | P32            | LOW_CONSUMPTION | I/O | When 1 minutes passed after power off and then go into stop mode and port L, else H.                           |
| 61  | P31            | EVR CLK         | I/O | Clock signal for Function and E-volume                                                                         |
| 62  | Vcc            | 5V              |     |                                                                                                                |
| 63  | P30            | EVR DT          | I/O | Data signal for Function and E-volume                                                                          |
| 64  | Vss            | GND             |     |                                                                                                                |
| 65  | P27            | COMP VIDEO INH  | I/O | Component terminal control                                                                                     |
| 66  | P26            | COMP VideoB     | I/O | Component terminal control                                                                                     |
| 67  | P25            | COMP VideoA     | I/O | Component terminal control                                                                                     |
| 68  | P24            | SWDET           | I/O | "H": SW YES, "L": SW NO( SX316 no connect)                                                                     |
| 69  | P23            | VIDEO3          | I/O | NJM2296 control (VIDEO input select) (SX316 no connect)                                                        |
| 70  | P22            | VIDEO2          | I/O | NJM2296 control (VIDEO input select) (SX316 no connect)                                                        |
| 71  | P21            | VIDEO1          | I/O | NJM2296 control (VIDEO input select) (SX316 no connect)                                                        |
| 72  | P20            | DC PROTECT      | I/O | Amplifier DC detection. H:Normal, L:Abnormal                                                                   |
| 73  | P17            | OL DET          | I/O | Amplifier overload detection. H:Normal, L:Abnormal                                                             |
| 74  | P16/INT4       | DSP OL          | I/O | ANALOG OVER LOAD detect (H : detect)                                                                           |
| 75  | P15/INT3       | RDS CLK         | I/O | RDS clock in signal                                                                                            |
| 76  | P14            | RDS DT          | I/O | RDS data in signal                                                                                             |
| 77  | P13            | RDS FM+         | I/O | RDS power supply. FM: Low, AM:High                                                                             |
| 78  | P12            | NC              | I/O |                                                                                                                |
| 79  | P11            | NC              | I/O |                                                                                                                |
| 80  | P10            | NC              | I/O |                                                                                                                |
| 81  | P07            | TUNER DO        | I/O | Data input signal for tuner control                                                                            |
| 82  | P06            | TUNER CLK       | I/O | Clock signal for tuner control                                                                                 |
| 83  | P05            | TUNER DI        | I/O | Data output signal for tuner control                                                                           |
| 84  | P04            | TUNER CE        | I/O | Chip select signal for tuner control                                                                           |
| 85  | P03            | 6 OHM           | I/O | if stop mode, port L, else according to setting (J model No connect)                                           |
| 86  | P02            | NC              | I/O |                                                                                                                |
| 87  | P01            | NC              | I/O |                                                                                                                |
| 88  | P00            | DECO MUTE       | I/O | 1st DSP detect port                                                                                            |
| 89  | P107/AN7/KI3   | XPROTECT        | I/O | Power supply abnormal condition detection. H: Normal, L: Abnormal.                                             |
| 90  | P106/AN6/KI2   | MVRATT          | I/O | Master volume ATT control (-15dB or less : L)                                                                  |
| 91  | P105/AN5/KI1   | NC              | I/O |                                                                                                                |
| 92  | P104/AN4/KI0   | iPod POW        | I/O | iPod power supply. H always. When abnormally detecting it, it makes it to L.                                   |
| 93  | P103/AN3       | NC              | I/O |                                                                                                                |
| 94  | P102/AN2       | SIMUKE1         | I/O | Input 1 to switch region                                                                                       |
| 95  | P101/AN1       | SIMUKE2         | I/O | Input 2 to switch region                                                                                       |
| 96  | AVSS           | AVSS            |     | connects with VCC.                                                                                             |
| 97  | P100/AN0       | HP DET          | I/O | HP detection H:detected.                                                                                       |
| 98  | VREF           | VREF            |     | connects with VCC.                                                                                             |
| 99  | AVcc           | AVCC            |     | connects with VCC.                                                                                             |
| 100 | P97/ADTRG/SIN4 | USDAO           | I/O | data input from USB                                                                                            |

### ■ Pin Arrangement (Top View)

# **• Pin Function**

| No. | Port      | Pin Name   | I/O | Pin Function                                    |
|-----|-----------|------------|-----|-------------------------------------------------|
| 1   | VDD1      | +5V        | -   | positive power supply                           |
| 2   | VSS1      | GND        | -   | ground potential                                |
| 3   | X1        | Resonator  | I   | crystal connection for system clock oscillation |
| 4   | X2        | Resonator  | -   | crystal connection for system clock oscillation |
| 5   | IC(VPP)   | GND        | -   |                                                 |

## 7.3 EXPLANATION

### 7.3.1 DETECTION CIRCUIT

1. DC Derection Circuit Diagram : Example of VSX-816/KUXJ/CA

2. Overload Detection Circuit Diagram: Example of VSX-816/KUXJ/CA FRONT Channel

3. Fan Stop Protection Circuit Diagram

#### 4. XPROTECT Detection Circuit Diagram

When below 6 kind of voltage supply become to be short circuit to GND, XPROTECT circuit work and U-P input port voltage change from +5 V to 0 V. The U-P detect this condition as ERROR.

- Voltage supply to POWER AMP IC (V neck+)
- Voltage supply to POWER AMP IC (V neck-)
- Voltage supply to POWER AMP IC (VH+)
- Voltage supply to POWER AMP IC (VH-)
- Voltage supply to +12 V REGULATOR IC
- Voltage supply to -12 V REGULATOR IC

1. DC-abnormality detection

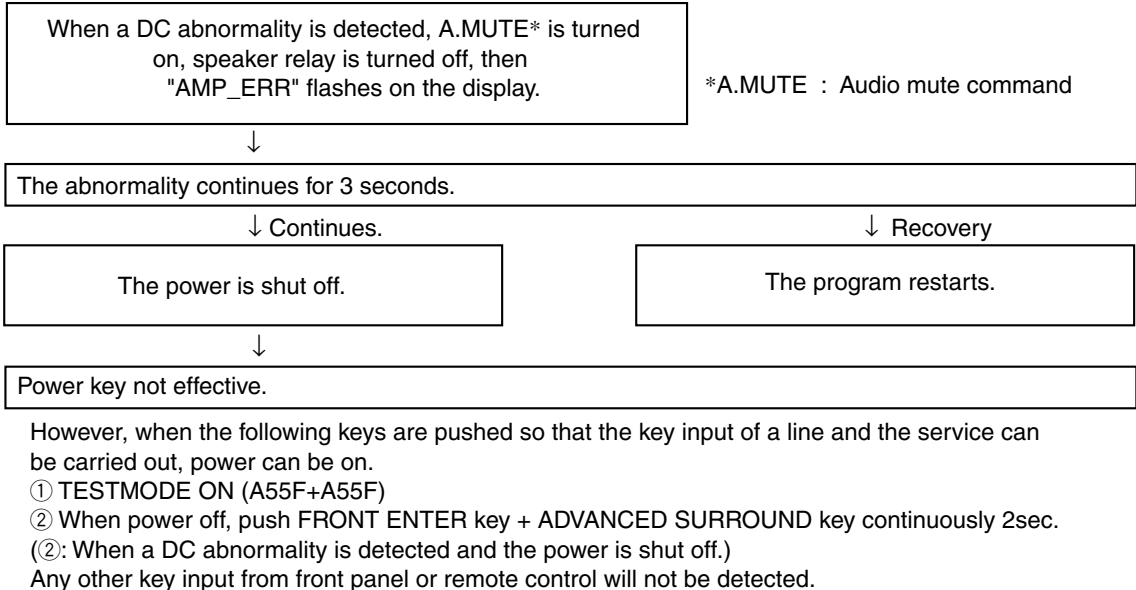

DC detection is only enabled 2 seconds after power-on.

If there is a fault in the power amplifier or a high-level signal lower than 5 Hz is input, the DC\_DET port becomes “L”.

If the “L” is detected, the microprocessor will perform as following flow chart.

A

In the case of simultaneous detection with the overload protection circuit, DC-abnormality detection is performed preferentially to overload detection.

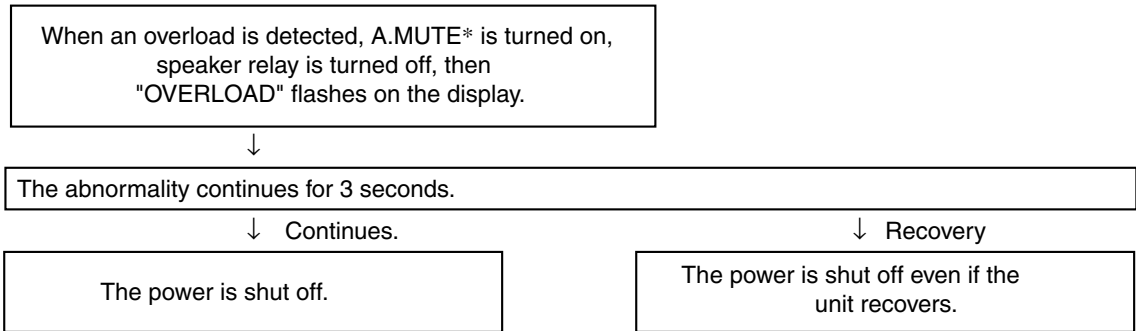

2. Overload detection

If the speaker terminals are short-circuited or low-load driving is detected, the OL\_DET port becomes “L”.

If the “L” is detected, the microprocessor will perform as following flow chart.

D

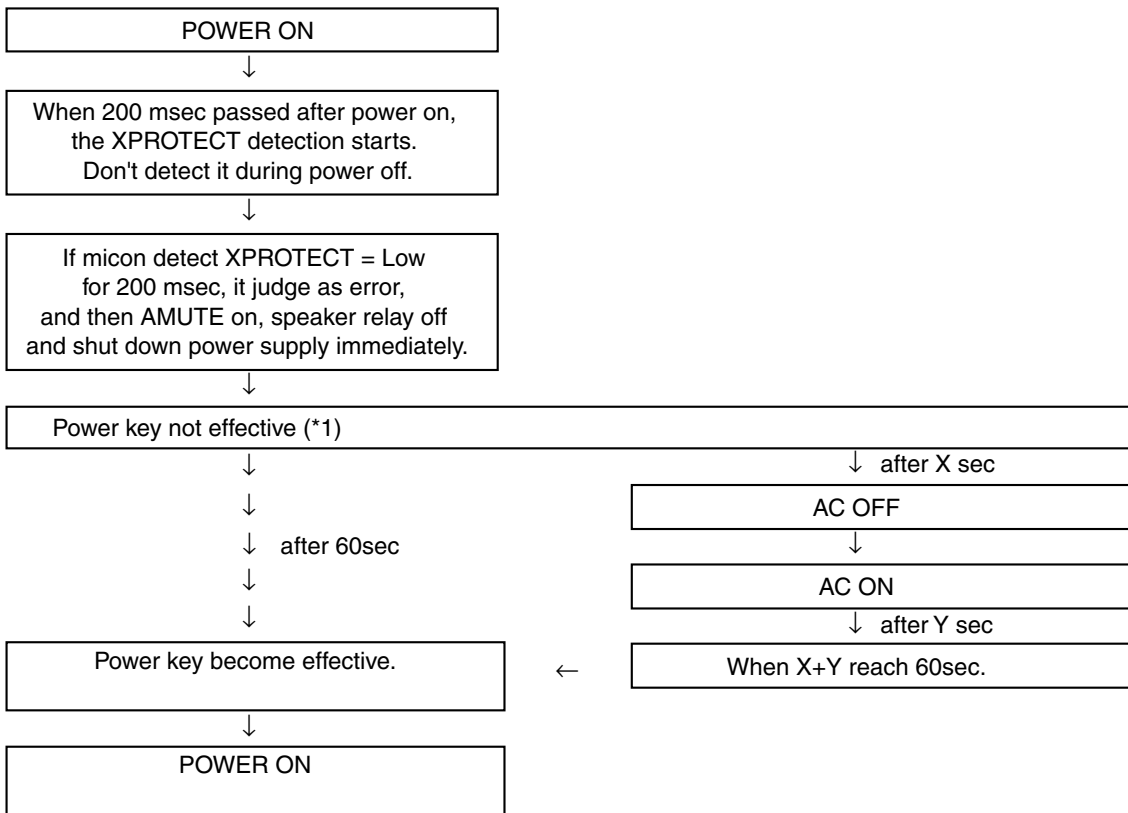

### 3. XPROTECT detection

XPROTECT is started to be monitored 200msec after power on.

XPROTECT port is checked every 20msec.

If Low level (ERROR) is recognized during consecutive 9 times, micon judge it as XPROTECT ERROR.

It processes more preferentially than DC abnormal detection and overload detection.

(\*1) However, when the following keys are pushed so that the key input of a line and the service can be carried out, power can be on.

① TESTMODE ON (A55F+A55F)

② When power off, push FRONT ENTER key + ADVANCED SURROUND key continuously 2sec.

(Effective, only when power-off is carried out by DC detection / XPROTECT detection)

Any other key input from front panel or remote control will not be detected.

### 4. Fan stop detection operation flow in the DC abnormality detection

If the fan is forcibly stopped, the 'DC PROT' port becomes "L". Then an abnormality of fan is detected.

\*A.MUTE : Audio mute command

However, when the following keys are pushed so that the key input of a line and the service can be carried out, power can be on.

① TESTMODE ON (A55F+A55F)

② When power off, push FRONT ENTER key + ADVANCED SURROUND key continuously 2sec.

(Effective, only when power-off is carried out by DC detection)

### 7.3.3 AMPLIFIER FAILURE DIAGNOSIS FLOW CHART

#### ■ Amplifier failure diagnosis flow chart

When DC detection is activated ("AMP\_ERR" flashes on the display), failure (damage) of the power amplifier section is considered.

As DC detection and fan stop protection circuits commonly use same abnormality detection port in microprocessor, please make sure that the operation of fan motor is in normal condition before proceeding to the troubleshooting of amplifier.

#### Caution:

**When releasing the lock state of power key before repair, please be careful because there is the possibility that more damages will occur when turning on the power once again!**

- According to a symptom, perform the following confirmation beforehand.

1) Is the operation of fan motor in normal condition?

↓

2) Are there any Fuses and IC protectors open?

↓

3) After turn on the power, confirm that the supply voltage of the point that can be measured is appropriate. (Particularly the supply voltage of the power Tr and drive step)

↓

4) Whether the voltage of pin3 of IC600, IC601, IC602 or IC603 is equal to (VL-0.7V). If not (eg, equal to VH), then change the corresponding power pack IC600, IC601, IC602 or IC603.

↓

5) Furthermore, check the output DC voltage of each channel of power pack IC600, IC601, IC602 and IC603 to limit the failure channel and identify the defect power pack.

↓

- After identify the failure channel, check that each part is not damaged (resistor, diode... etc. value / open / short)

# 8. PANEL FACILITIES

## Front panel SX-316-S/MYXJ5

### 1 Input select buttons

Press to select an input source.

### 2 Character display

### 3 ENTER

### 4 MULTI JOG dial

### 5 MPX

Use to switch between auto stereo and mono reception of FM broadcasts. If the signal is weak then switching to mono will improve the sound quality.

### 6 VSB MODE

Selects the Virtual Surround Back (VSB) mode.

### 7 DIALOGUE ENHANCEMENT

This feature localizes dialog in the center channel to make it stand out from other background sounds in a TV or movie soundtrack.

### 8 FRONT AUDIO INPUT

### 9 MASTER VOLUME

Use to set the listening volume.

### 10 LISTENING MODE buttons

#### STANDARD

Press for Standard decoding and to switch between Pro Logic II options.

#### ADVANCED SURR

Switches between the various surround modes.

#### ST/DIRECT/AUTO SURR

Switches between direct and stereo playback. Direct playback bypasses the tone controls for the most accurate reproduction of a source. Also selects the Auto Surround mode (Auto playback).

### 11 **STANDBY/ON**

Switches the receiver between standby and on.

### 12 PHONES jack

### 13 EON MODE

Use to search for programs that are broadcasting traffic or news information.

### 14 PTY SEARCH

Use this button to search for RDS program types.

### 15 MIDNIGHT/LOUDNESS

These features give you good sound at low volume levels when listening to movie (Midnight) or music (Loudness) sources. Press to switch between **MIDNIGHT**, **LOUDNESS**, and **OFF**.

### 16 SLEEP

Press to change the amount of time before the receiver switches into standby (**30 min - 60 min - 90 min - Off**).

### 17 MUTE

Mutes/unmutes the sound.

### 18 TUNER EDIT

Press to memorize and name a station for recall.

### 19 TONE

Press this button to access the bass and treble controls, which you can then adjust with the **MULTI JOG** dial.

### 20 QUICK SETUP

### 21 System Setup menu controls

#### SETUP

Press to access the System Setup menu.

#### RETURN

Confirm and exit the current menu screen.

## 1 SIGNAL indicators

Lights to indicate the type of input signal assigned for the current component:

### [DIGITAL] DIGITAL

Lights when a Dolby Digital<sup>1</sup> encoded signal is detected.

### [ANALOG] ANALOG

Lights when an analog signal is detected.

### [DTS] DTS

Lights when a DTS<sup>2</sup> encoded audio signal is detected.

### [DIGITAL] DIGITAL

Lights when a digital audio signal is detected.

## 2 [DTS] DTS

When the **STANDARD** mode of the receiver is on, this lights to indicate decoding of a DTS multichannel signal.

## 3 [DIGITAL] DIGITAL

When the **STANDARD** mode of the receiver is on, this lights to indicate decoding of a Dolby Digital multichannel signal.

## 4 [PRO LOGIC II] PRO LOGIC II

When the **(STANDARD)** Pro Logic II mode of the receiver is on, [PRO LOGIC II] lights to indicate Pro Logic II decoding (see Listening in surround sound for more on this).

## 5 [VIR. SB] VIR. SB

Lights during Virtual surround back processing.

## 6 [DIRECT] DIRECT

Lights when source direct playback is in use. Direct playback bypasses the tone controls for the most accurate reproduction of a source.

## 7 [AUTO SURR.] AUTO SURR.

Lights when the Auto Surround feature is switched on (see Auto playback).

## 8 [ATT] ATT

Lights when **ANALOG ATT** is used to attenuate (reduce) the level of the analog input signal.

## 9 [SLEEP] SLEEP

Lights when the receiver is in sleep mode.

## 10 Tuner indicators

### [MONO] MONO

Lights when the mono mode is set using the **MPX** button.

### [STEREO] STEREO

Lights when a stereo FM broadcast is being received in auto stereo mode.

### [TUNED] TUNED

Lights when a broadcast is being received.

## 11 Speaker indicator

Shows if the speaker system is on or not. **SP▶A** means the speakers are switched on. **SP▶** means the headphones are connected.

## 12 EON/RDS indicators

### [EON] EON

Lights when the EON mode is set, and flashes during an EON broadcast. The **[EON]** indicator lights when the current station carries the EON service.

### [RDS] RDS

Lights when an RDS broadcast is received.

## 13 Character display

### 14 ADV. SURR. (Advanced Surround)

Lights when one of the Advanced Surround modes has been selected.

### 15 WMA9 Pro

Lights to indicate decoding of a WMA9 Pro signal.

### 16 MIDNIGHT

Lights during Midnight listening.

### 17 D.E.

Lights when Dialog Enhancement (**DIALOG E**) is switched on.

### 18 LOUDNESS

Lights during Loudness listening.

### 19 Master volume level

Shows the overall volume level. **---dB** indicates the minimum level, and **- 0 dB** indicates the maximum level.

#### 1 RECEIVER

Switches the receiver between standby and on.

#### 2 Listening mode buttons

##### STANDARD

Press for Standard decoding and to switch between Pro Logic II options.

##### ADV.SURR.

Switches between the various surround modes.

##### STEREO

Switches between direct and stereo playback. Direct playback bypasses the tone controls for the most accurate reproduction of a source. Also selects the Auto Surround mode(Auto playback).

##### MIDNIGHT/LOUDNESS

These features give you good sound at low volume levels when listening to movie (Midnight) or music (Loudness) sources. Press to switch between **MIDNIGHT**, **LOUDNESS**, and **OFF**.

#### 3 TOP MENU

Displays the disc "top" menu of a DVD disc.

#### SETUP

Press to access the System Setup menu.

#### 4 TUNER EDIT\*

Press to memorize and name a station for recall.

Also functions as the SETUP button for DVD/DVR units.

#### S. RETRIEVER

Press to restore CD quality sound to compressed audio sources.

#### 5 RECEIVER CONTROL buttons

##### VOLUME +/-

Use to set the listening volume.

##### EFFECT/CH SEL

Press repeatedly to select a channel, then use **LEVEL +/-** to adjust the level. Also selects the Advanced Surround effect level (use **LEVEL +/-** to adjust).

##### LEVEL +/-

Use to adjust the effect and channel levels.

##### MUTE

Mutes/unmutes the sound.

#### 6 SHIFT

Press to access commands in a rectangle (above the buttons) on the remote. These buttons are marked with an asterisk(\*) in this section.

#### 7 SLEEP

Press to change the amount of time before the receiver switches into standby (**30 min - 60 min - 90 min - Off**).

#### DIMMER

Dims or brightens the display.

#### ANALOG ATT

Attenuates (lowers) the level of an analog input signal to prevent distortion.

#### 8 INPUT SELECTOR buttons

Press to select an input source (press **DVD/DVR** to use the DVD player/recorder controls on the remote).

#### RECEIVER

Use to switch to the receiver controls on the remote control. Also used when setting up the surround sound for the receiver.

#### 9 MENU

Displays the disc menu of DVD-Video discs.

#### DIALOG E

This feature localizes dialog in the center channel to make it stand out from other background sounds in a TV or movie soundtrack.

#### 10 ↑↓←→ / ENTER

## 11 RETURN

Confirm and exit the current menu screen.

### ONE TOUCH COPY\*

Copies the currently playing title from DVD to HDD or vice-versa.

## 12 DVD/DVR control buttons

You can use these buttons to control a Pioneer DVD player or recorder connected to your system.(press **DVD/DVR** to access the below controls).

| Button                                                                                           | What it does                                                                       |
|--------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| <b>DVD/DVR</b>  | Turns DVD player or DVD recorder power on/off.                                     |
| <b>AUDIO</b>                                                                                     | Changes the audio language or channel.                                             |
| <b>SUBTITLE</b>                                                                                  | Displays/changes the subtitles on multilingual DVD-Video discs.                    |
| <b>CH +/-</b>                                                                                    | Switches channels.                                                                 |
|                 | Starts/resumes normal playback.                                                    |
|                 | Pauses/unpauses a disc.                                                            |
|                 | Stops playback.                                                                    |
|                 | Press to start fast reverse scanning.                                              |
|                 | Press to start fast forward scanning.                                              |
|                 | Skips to the start of the current track or chapter, then previous tracks/chapters. |
|                 | Skips to the next track or chapter.                                                |
| <b>HDD/DVD*</b>                                                                                  | Switch between the hard disk and DVD controls for DVD/HDD recorders.               |
| <b>GUIDE*</b>                                                                                    | Displays the guides on a DVD recorder.                                             |
|  <b>REC*</b>  | Starts recording.                                                                  |
| <b>TIMER REC*</b>                                                                                | Accesses the timer recording menu.                                                 |
| <b>INFO*</b>                                                                                     | Displays additional EPG information.                                               |
| <b>REC STOP*</b>                                                                                 | Stops recording.                                                                   |
| <b>JUKEBOX*</b>                                                                                  | Switches to the Jukebox feature.                                                   |
| <b>TUNER EDIT*</b>                                                                               | Press to access the SETUP menu .                                                   |

## 13 TUNER controls

The **TUNING +/-** buttons can be used to find radio frequencies and the **STATION +/-** buttons can be used to select preset radio stations.

### DISPLAY

Switch the display between station preset name, frequency (see tip on) and RDS data.

### CLASS

Switches between the three banks (classes) of station presets.

### MPX

Use to switch between auto stereo and mono reception of FM broadcasts. If the signal is weak then switching to mono will improve the sound quality.

## About the WMA9 Pro decoder

This unit has an on-board Windows Media® Audio 9 Professional (WMA9 Pro) decoder, so it is possible to playback WMA9 Pro-encoded audio using a coaxial or optical digital connection when connected to a WMA9 Pro-compatible player. However, the connected DVD player, set-top box, etc. must be able to output WMA9 Pro format audio signals through a coaxial or optical digital output.

Microsoft, Windows Media®, and the Windows logo are trademarks, or registered trademarks of Microsoft Corporation in the United States and/or other countries.

CLEANING

A

Before shipping out the product, be sure to clean the following positions by using the prescribed cleaning tools:

| Position to be cleaned | Cleaning tools           |
|------------------------|--------------------------|
| Fans                   | Cleaning paper : GED-008 |

B

C

D

E

F
