P-Channel 20 V (D-S) MOSFET

PRODU	PRODUCT SUMMARY					
V _{DS} (V)	R _{DS(on)} (Ω)	I _D (A) ^a	Q _g (TYP.)			
-20	0.052 at V _{GS} = -4.5 V	_S = -4.5 V -8 ^e	8			
-20	0.082 at V _{GS} = -2.5 V	-7.5	8			

FEATURES

- TrenchFET® power MOSFET
- 100 % R_g tested

 Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

ROHS COMPLIANT HALOGEN FREE

PowerPAK® ChipFET® Single

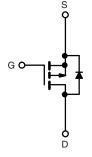

Bottom View

APPLICATIONS

- · Load switch
- HDD DC/DC

P-Channel MOSFET

Ordering Information:

Si5459DU-T1-GE3 (Lead (Pb)-free and halogen-free)

PARAMETER	SYMBOL	LIMIT	UNIT	
Drain-Source Voltage	V _{DS}	-20	V	
Gate-Source Voltage		V _{GS}	± 12	
	T _C = 25 °C		-8 e	
Continuous Dusin Comment /T 150 °C	T _C = 70 °C	1 . \Box	-8 e	
Continuous Drain Current (T _J = 150 °C)	T _A = 25 °C	I _D	-6.7 ^{b, c}	
	T _A = 70 °C	1	-5.3 ^{b, c}	А
Pulsed Drain Current (10 µs pulse width)		I _{DM}	-20	
0 0 15:10	T _C = 25 °C		-8 e	
Source-Drain Current Diode Current	T _A = 25 °C	ls —	-2.9 ^{b, c}	
	T _C = 25 °C		10.9	
Mayimum Dayyar Dissination	T _C = 70 °C] , [7	w
Maximum Power Dissipation	T _A = 25 °C	P _D	3.5 b, c	vv
	T _A = 70 °C		2.2 b, c	
Operating Junction and Storage Temperature Range		T _J , T _{stg}	-50 to 150	°C
Soldering Recommendations (Peak temperature) d		260		

THERMAL RESISTANCE RATINGS					
PARAMETER		SYMBOL	LIN	ИIT	UNIT
PARAMETER		STWIDOL	TYPICAL	MAXIMUM	
Maximum Junction-to-Ambient b, d	t ≤ 10 s	R _{thJA}	30	36	°C/W
Maximum Junction-to-Case (Drain)	Steady State	R_{thJC}	9.5	11.5	C/VV

Notes

a. Based on $T_C = 25$ °C.

S16-0980-Rev. C, 23-May-16

- b. Surface mounted on 1" x 1" FR4 board.
- c. t = 10 s.
- d. Maximum under steady state conditions is 72 °C/W.
- e. Package limited.
- f. See solder profile (www.vishay.com/doc?73257). The PowerPAK ChipFET is a leadless package. The end of the lead terminal is exposed copper (not plated) as a result of the singulation process in manufacturing. A solder fillet at the exposed copper tip cannot be guaranteed and is not required to ensure adequate bottom side solder interconnection.
- g. Rework conditions: Manual soldering with a soldering iron is not recommended for leadless components.

Notes

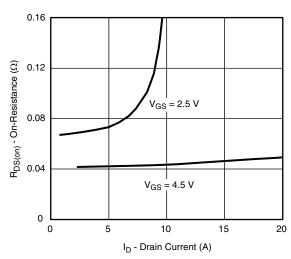

- a. Guaranteed by design, not subject to production testing.
- b. Pulse test; pulse width $\leq 300~\mu s,~duty~cycle \leq 2~\%.$

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

Power Derating, Junction-to-Ambient

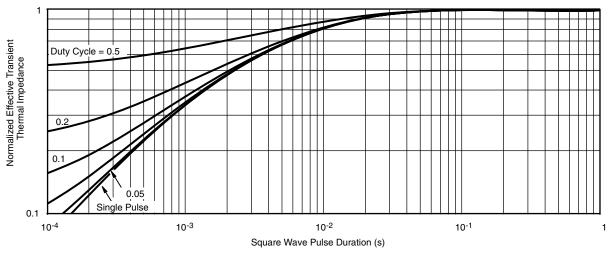

Note

a. The power dissipation P_D is based on $T_{J \text{ (max.)}} = 150 \,^{\circ}\text{C}$, using junction-to-case thermal resistance, and is more useful in settling the upper dissipation limit for cases where additional heatsinking is used. It is used to determine the current rating, when this rating falls below the package limit.

Normalized Thermal Transient Impedance, Junction-to-Ambient

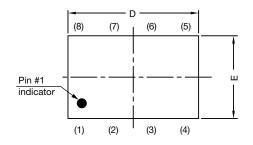

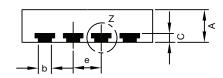

Normalized Thermal Transient Impedance, Junction-to-Case

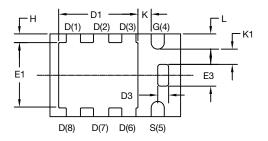

Vishay Siliconix maintains worldwide manufacturing capability. Products may be manufactured at one of several qualified locations. Reliability data for Silicon Technology and Package Reliability represent a composite of all qualified locations. For related documents such as package/tape drawings, part marking, and reliability data, see www.vishay.com/ppg265017.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.
