**T B 1 2 3 1 C N****PAL / NTSC 1CHIP (IF + VCD PROCESSOR) IC**

TB1231CN is the IF & Video processing IC for PAL/NTSC color TV system. This IC demodulates PAL/NTSC PIF, SIF and composite video signal to R/G/B primary colors and Audio signals. This IC can constitute Multi-Color System by combined with TA1275AZ (SECAM Processor).

TB1231CN has the analog R/G/B interface, therefore it is easy to make up PIP system by using this IC.

Because of the built-in video and audio switch, TB1231CN can deal with an external channel without extra switch.

TB1231CN has an I<sup>2</sup>C BUS interface. Various controls (Brightness, Color etc.) can be done via two bus lines.
