

## TEC1-12703 Datasheet

性能参数:

| No. | Items               | Symbol           | Parameter      | Condition                    |
|-----|---------------------|------------------|----------------|------------------------------|
| 1   | Max. Operating Tem. | T                | 200℃           |                              |
| 2   | Max. Cooling Power  | Qmax             | 33             | Vacuum testing Tem<br>Th=30℃ |
| 3   | Tem. Difference Max | $\Delta T_{max}$ | 68             | Vacuum testing Tem<br>Th=30℃ |
| 4   | Input Voltage Max.  | Vmax             | 15.4           | Vacuum testing Tem<br>Th=30℃ |
| 5   | Max. Current        | I <sub>max</sub> | 3.0            | Vacuum testing Tem<br>Th=30℃ |
| 6   | Resistance          | R                | 3.2-3.5        | Ambient Tem<br>Th=25℃        |
| 7   | Parallel            |                  | $\leq 0.05$ mm |                              |

When the ambient temperature raise or fall 1℃, the module resistance will raise or fall 0.015 accordingly.
