

TEW6055 is designed to interface with the subscribers premises (NT) and the 2-wire line side of the Central Office Equipment (LT) in the ISDN Network.

TEW6055 meets the electrical specifications of ANSI T1.601-1988 and the requirements for the **Mitel MT8910** DSLIC device.

Applications:

- High performance 2B1Q line code.
- Up to 50 mA line current.
- High insulation between line and equipment side.
