

Thermopile Infrared Detectors

# Thermopile Detector TPS 334 L10.6

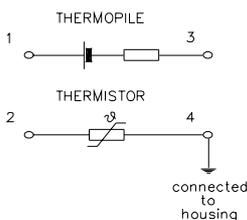

**New: Integrated silicon lens**

**Small spot size: distance – spot size ratio: D:S = 11:1**

**For industrial remote temperature measurement applications**

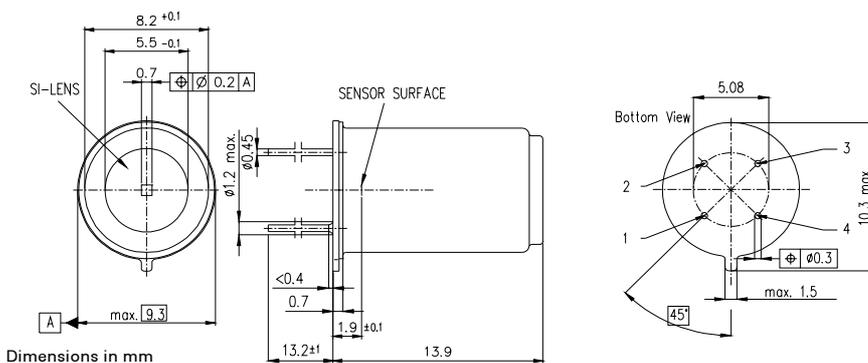

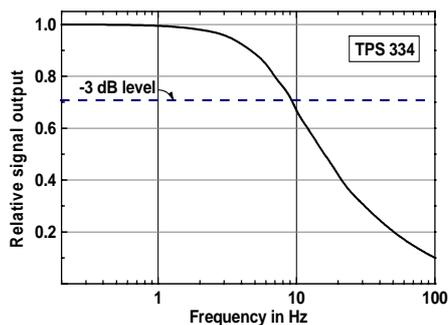

The **TPS 334 L10.6** detector extends the features of the TPS 334 through an integrated micromachined silicon lens optics.

In TO 5 type housing it employs a chip of 0.7 x 0.7 mm<sup>2</sup> absorber size with a 30 kΩ thermistor as temperature reference and a lens with 10.6 mm focal length. An inlay in the housing suppresses reflections at the cap. The lens is not coated, but if a restricted wavelength region is desired (e.g. 8..14 μm), it is possible to equip the inlay with an additional filter (e.g. G9). The sensor shows a flat sensitivity characteristics over the wavelength.
