SOT-23-5L

The WL2851E series is a high accuracy, high input voltage low quiescent current, high speed, and low dropout Liner regulator with high ripple rejection. The device is manufactured with Bi-CMOS process.

The WL2851E offers over-current limit and over temperature protection to ensure the device working in well conditions.

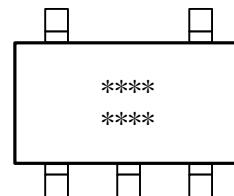

The WL2851E regulators are available in standard SOT-23-5L packages. Standard products are Pb-free and Halogen-free.
