

DC/DC Converter

WRA_P- 3WR2 & WRB_P- 3WR2 Series

MORNSUN®

3W, wide input isolated & regulated single/dual output
DC-DC converter

CE Patent Protection RoHS

FEATURES

- Wide input voltage range (2:1)
- High efficiency up to 86%
- Isolation voltage 1.5KVDC
- Output short circuit protection (self-recovery)
- Operating temperature range: -40°C ~ +85°C
- Meet CISPR22/EN55022 CLASS A
- EN60950 approval

The WRA_P-3WR2 & WRB_P-3WR2 series are isolated 3W DC-DC products with 2:1 input voltage and conventional voltage output. The product has a relatively compact DIP package, and features high efficiency, operating temperature of -40°C ~ +85 °C, remote control, and continuous short-circuit protection. The smaller size and fine cost design make the converter an ideal solution in communication, instruments, and industrial electronics applications.

Notes:

① Exceeding the maximum input voltage may cause permanent damage;

② For the dual output modules, the capacitive loads of positive and negative outputs are the same.

Design Reference

1. Output load requirements

To ensure that the module can work efficiently and reliably, its output min. load shall be no lower than 5% of the rated load when using, or the output ripple may increase rapidly. Ensure that the product working load must be higher than 5% of the rated load.

2. Typical application

All the DC/DC converters of this series are tested according to the recommended circuit (see Fig. 2) before delivery.

If it is required to further reduce input and output ripple, properly increase the input & output of additional capacitors C_{in} and C_{out} or select capacitors of low equivalent impedance provided that the capacitance is no larger than the max. capacitive load of the product.

Note: ①. Part ① in the Fig. 3 is used for EMS test and part ② for EMI filtering; selected based on needs.

②. If there is no recommended parameters, the model no require the external component.

4. Input current

When the electricity is provided by the unstable power supply, please make sure that the range of the output voltage fluctuation and the ripple voltage of the power supply do not exceed the indicators of the modules. Input current of power supply should afford the flash startup current of this kind of DC/DC module (see Fig. 5).

Generally: Vin=5V Iave=1297mA
 Vin=12V Iave=649mA
 Vin=24V Iave=307mA
 Vin=48V Iave=158mA

Dimensions and Recommended Layout

Notes:

1. Packing information please refer to Product Packing Information which can be downloaded from www.mornsun-power.com. Packing bag number: 58210008;
2. Recommend to use module with more than 5% load, if not, the ripple of the product may exceeds the specification, but does not affect the reliability of the product;
3. The recommended unbalance degree of the dual output module load is $\leq \pm 5\%$; if the degree exceeds $\pm 5\%$, than the product performance cannot be guaranteed to comply with all parameters in the datasheet. Please contact our technicians directly for specific information;
4. The maximum capacitive load offered were tested at nominal input voltage and full load;
5. Unless otherwise specified, parameters in this datasheet were measured under the conditions of $T_a = 25^\circ\text{C}$, humidity $< 75\% \text{RH}$ with nominal input voltage and rated output load;
6. All index testing methods in this datasheet are based on Company's corporate standards;
7. The performance parameters of the product models listed in this manual are as above, but some parameters of non-standard model products may exceed the requirements mentioned above. Please contact our technicians directly for specific information;
8. We can provide product customization service;
9. Specifications are subject to change without prior notice.
