

Features

- Efficiency up to 80%
- 1600VDC Isolation
- Singl/Double output
- Regulated output
- Remote On/Off Control
- Continous short circuit protection
- 2:1 Wide input voltage range
- Wide temperature -40℃ to 85℃
- Low ripple and noise
- Small size

Design & Feature Considerations

1. Input/Output Ripple Reduction

Reduce output ripple, it is recommended to use capacitors at the input/output.

It is recommended to use 10uF~100uF capacitors at the input; 3.3~22uF capacitors at the output.

2. Overload Protection

The products provide protection against overload, the unit is equipped with internal current limiting circuitry .

3. Remote On/Off (CTRL Terminal)

When open or high impedance, the converter work well; When this pin is high, the converter shut down; It should be note that the input current should be between 5-10mA, exceeding the maximum 20mA will cause permanence damage to the converter.

The value of R can be derived as follows:

$$R = \frac{V_C - V_D - 1.0}{I_C}$$

Note

- 1.To ensure this module can operate effcinetly and reliably,During operation,the minimum output load is not less than 10% of the full load.
- 2.Other input and output voltage may be available, please
- 3.Specifications subject to change without notice
