Warning: DO NOT USE IN LIFE SUPPORT

LIFE SUPPORT POLICY

ZILOG'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS PRIOR WRITTEN APPROVAL OF THE PRESIDENT AND GENERAL COUNSEL OF ZILOG CORPORATION.

As used herein

Life support devices or systems are devices which (a) are intended for surgical implant into the body, or (b) support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in a significant injury to the user. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system or to affect its safety or effectiveness.

Overview

Zilog's Passive Infrared (PIR) sensors are designed to deliver high performance and excellent EMI immunity for the most demanding motion detection applications.

The ZSLM323511 PIR sensor is a surface mount device compatible with IR reflow processes. It is used in combination with a PIR lens and consists of two sensing elements behind a spectral filter window tuned to 8-13um wavelength to help block out unwanted IR energy sources. The 0.6mm element spacing provides additional white light protection.

The ZSLM323511 is a low-profile device. The height of the sensor element is compatible with standard TO5 package (through-hole) PIR sensors.

Features

The key features of ZSLM323511 are:

- Dual-element balanced differential (series opposed) PIR sensor
- High PSRR
- Built in EMI compensation
- White Light Protection
- Elements are 0.75mm x 2.3mm spaced 0.6mm apart
- Low profile surface mount package
- Recommended operating voltage range of 1V to 15V
- Operating temperature range of -40°C to +70°C

Applications

- Security/intrusion motion detectors
- Lighting control
- Video Doorbell
- IP Camera

Ordering Information

| Part Number | Description |
|-------------|---|
| ZSLM323511 | Dual-Element Pyroelectric Sensor – Surface Mount, Low Profile |

Electrical Characteristics

- | | |
|---|---|
| 1) Signal output: | Min. 2.0 V _{P-P} (Typ. 3.5 V _{P-P}) |
| 2) Noise output: | Max. 250 mV _{P-P} (Typ. 70 mV _{P-P}) |
| 3) Balance output: | Max. 10% $Bo = [SA-SB / SA+SB] \times 100$ <p>Bo: Balance output SA: Absolute signal output on Element A SB: Absolute signal output on Element B</p> |
| 4) Source voltage: | 0.3 V to 1.4 V (V _d : 5V, R _s : 47K ohm) |
| 5) Operating voltage (V _d): | 1 V to 15 V (R _s : 47K ohm) |

Notes:

Test set-up block diagram see Figure 1 and Figure 2.

Test circuit configuration see Figure 3.

Items 1,2 ,3 and 4 are 100% tested.

Optical Characteristics

- | | |
|---------------------------|--|
| 1) Typical field of view: | 150 degrees from center of element on axis X 139 degrees from center of element on axis Y (See Figure 4) |
| 2) Filter substrate: | Silicon |
| 3) Cut on (5%T ABS): | 5.0 ±1.0 micron |
| 4) Transmissivity: | ≥70% average 8 to 13 micron |

Environmental Characteristics

- | | |
|---------------------------|--------------------------|
| 1) Operating temperature: | -40°C to +70°C |
| 2) Storage temperature: | -40°C to +80°C |
| 3) Operating humidity: | 95% RH or less (at 30°C) |
| 4) Storage humidity: | 95% RH or less (at 30°C) |

RoHS Compliance

This product conforms to the RoHS Directive in force at the date of issuance of this Product Specification.

Test Conditions

The figures below show the configuration under which the PIR sensor electrical characteristics are tested.

Figure 1 - Test Set-up Configuration

Figure 2 - Occluder Position

Figure 3 - Test Circuit Configuration

Measurement Amp. Characteristics:

Type: Non-inverting; Gain: 72.5 dB at 1 Hz; Bandwidth: 0.4 to 2.7 Hz / -3 dB

Field of View

The typical field of view of the ZSLM323511 PIR sensor is shown in Figure 4.

Figure 4 - Field of View

PIR Sensor Circuit Diagram

The ZSLM323511 circuit diagram is shown in Figure 5.

Figure 5 - Circuit Diagram

Mechanical Dimensions

The dimensions of the ZSLM323511 PIR sensor is shown in the following figures.
All dimensions are $\pm 0.2\text{mm}$ unless otherwise stated.

Figure 6 - Top View

Figure 7 - Bottom View

Figure 8 - Side View

Recommended Pad Design

The recommended dimensions for the PCB layout pad design are shown in Figure 9.

Figure 9 - Recommended Land Design

IR Reflow Profile

Figure 10 shows the recommended IR reflow soldering profile. Actual conditions should be verified with production PCB's.

Figure 10 - IR Reflow Profile

Device Markings

Lot number information is marked on the top surface of the PIR sensor.

Example: 9 01 B

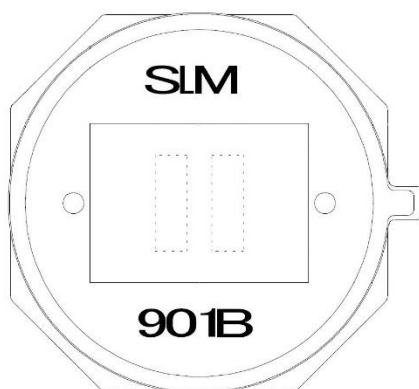

Figure 11 - Device Markings

Packaging

The ZSLM323511 PIR Sensor is shipped in standard embossed tape and reel and packed in boxes as shown in Figure 12 through Figure 17. Each reel consists of 500 pieces. The reels are packed in a carton (1 reel/carton) and 6 cartons are packed in a box for a total of 3,000 pieces per box.

Tape & Reel Specification

- 1) Standard Reel Quantity: 500 pieces.
- 2) Dimensions in Figure 12 and Figure 13 are in mm.

Usage Restrictions and Precautions

This section presents restrictions and precautions that apply to Zilog pyroelectric sensors.

Design Restrictions and Precautions

This sensor is designed for indoor purposes in which secondary accidents due to operation failure or malfunctions can be anticipated; therefore, add appropriate fail-safe functionality to your design. If these sensors are intended for outdoor applications, be sure to apply suitable supplementary optical filters and use a waterproof enclosure.

Usage Restrictions and Precautions

To prevent sensor malfunctions, operational failure, or any deterioration of their characteristics, do not operate these PIR sensors under the following, or similar, conditions:

- Rapid environmental temperature changes
- Strong shocks or vibrations
- In places where there are obstructing materials (glass, fog, etc.) through which infrared rays cannot pass within the detection area
- In fluids, corrosive gases, and sea breezes
- Under continual high-humidity atmospheric conditions
- Exposed to direct sunlight or automobile headlights
- Exposed to directly to forced-air currents from a heater or air conditioner

Handling and Storage Restrictions and Precautions

To prevent sensor malfunctions, operational failure, appearance damage, or any deterioration of their characteristics, do not expose these sensors to the following, or similar, handling and storage conditions:

- Vibrations over extended periods
- Strong shocks
- Static electricity or strong electromagnetic waves
- High temperature and humidity over extended periods
- Corrosive gases or sea breezes
- Dirty and dusty environments that may contaminate the optical window

Related Documents

The documents associated with the ZSLM323511 PIR sensor are listed below. Each of these documents, and others can be obtained from the [ZMOTION Product Page](http://www.zilog.com) on the Zilog website: <http://www.zilog.com>.
